- 1) *Achieve Goal Year 2050*
- 2) *Reset Global Economics*
- 3) *Enable New World Order*

Inventor & Author – Srinivas Devathi
Discuss THREE Global Transformations today

The 93 Trillion value invention and its chain reaction.

- THREE Global Transformations have the invention at source.
- **The invention has created economic activity worth 1000 to 2000 Trillion over the next 100 years.**
- **This generated greed in a multitude of directions.** Such wealth will:
 - Make India the richest country by its treasury holdings.
 - Make me (Indian citizen the richest man in the World).
 - Questions the power, hold of USA and UK on the World.
- I define a solution to the problem. Author Project Earthling©. And define the best way (correct way) to resolve the global IP rights problem.
- To the evolved new post – Project Earthling© world, the new governance structure in defined as UN-GGM-2020©.

19 January 2020

Reset Global Economics & Enable New World Order

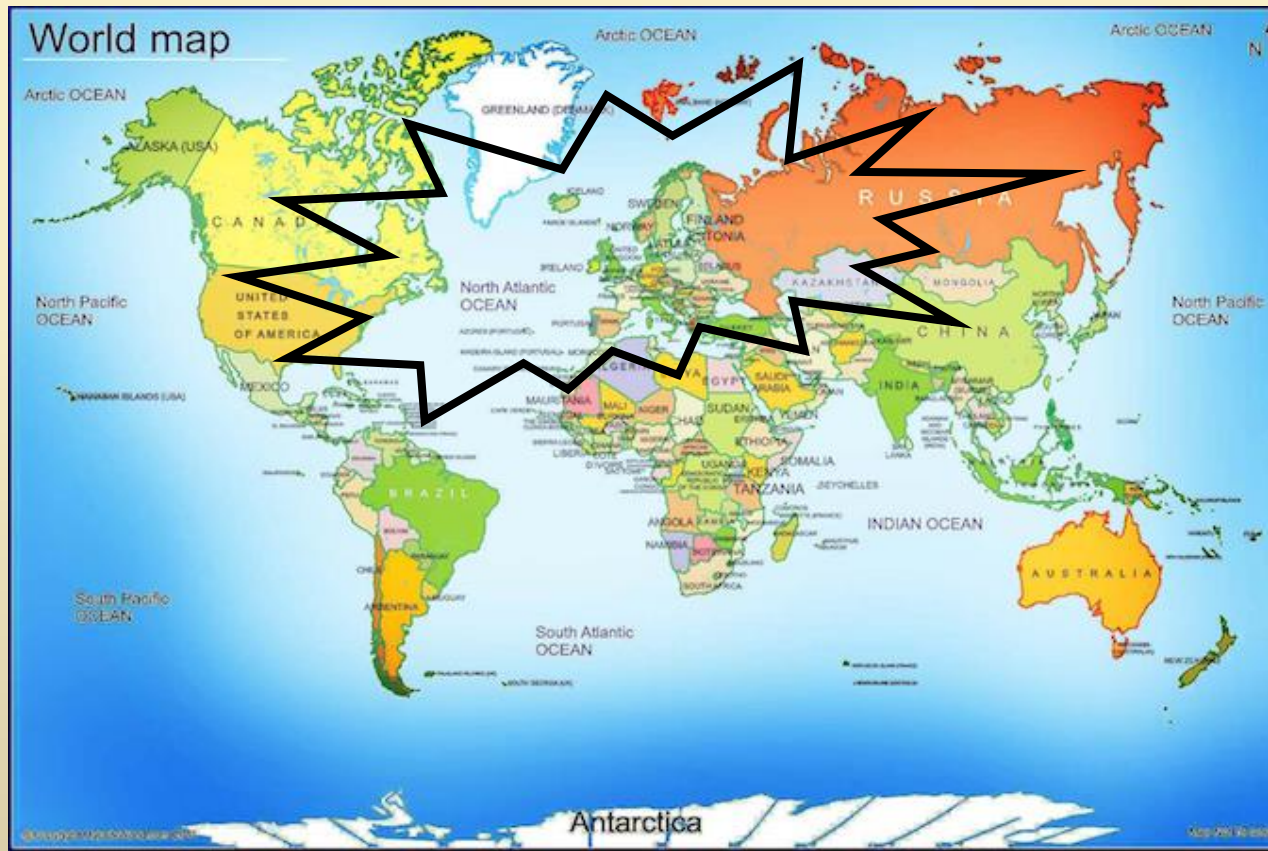

Enabling colorful times

The GREED has pulled INDIA in multiple directions – Use of Money & Power.

- **What can 93 Trillion value invention do to the World?**
- USA and UK went all out to build pressure on many in India. From Delhi to state governments, many have come under pressure. **Use of Power.**
- USA and UK to retain their hold, supremacy on the World, have done and tried a whole lot of alliances, partnerships with groups in India. All of them have now failed.
- USA rolled multitude of suitcases filled with Dollars (USD) to lobby or bribe many in India to gain control of this invention and India. **Use of Money.**
- **They wanted to make India a slave nation, reporting to them forever in future.**
- However, India is diametrically opposite to USA and UK. E.g., We are not a Christian country. We are a Hindu country, with around 14% Muslim population as second largest religion. We are neither white nor black by people's skin color. We are middle skin tone population. We are not Caucasian race. We are Aryans and Dravidians. We are multilingual, multi-cultural, multi-ethnic country. We are not (English only) speaking country. This has made their efforts difficult to deal with India.

The GREED has pulled the World in multiple directions – Use of Power globally.

- USA and UK's supremacy in the World for last 300 to 600 years has come under question and threat.
- USA and UK have tried multiple alliances, partnerships at global level, to try and block this invention, its wealth from me and India. Most of which have also failed because of my authored content Project Earthling© and United Nations Global Governance Model 2020©.
- USA and UK, have controlled the global organizations like 'United Nations'. **As they have conventionally been paid (for their expenses and salaries) in USD. Another way of putting this is that 'United Nations' and all its organs (including ICJ – International Court of Justice) report to USA and White House.**
- Many at UN, that I have tried to contact and reach out to, have either been retired or moved to a different division, ensuring there is no traction to my communications.
- **USA & UK have made all efforts to block my invention, its wealth from coming to me and India.**

Solving the GREED problem - bringing focus & concentration on India – Uniting India.

- **India, the country complements very well with my invention.** Why will it not? I am an Indian citizen. **Bring its interests to the center.**
- As media houses, you are aware of the key metrics related to India:
 - We are second most populous country with 1.32 Billion citizens.
 - Our GDP is at about 2.7 Trillion in \$s.
 - We are considered as a poor country, though categorized as a developing country and emerging economy.
 - We are supposed to have an approximate 40% population still under the Poverty line as defined by current day UN.
 - Our agriculture sector, healthcare sector and education sectors are still 20th century models and fully outdated to the demands and needs of 21st century.
 - Our water management, drought management is very poor to non-existent.
 - Our best cities are ailing with problems of pollution, old infrastructure and cannot be compared to top cities in World.

THE BEST PART – BY LAW USA's global fraud related to this invention of mine is documented beyond any reasonable doubt; and by virtue of Patent Cooperation Treaty & my Indian citizenship, I am entitled to bring all 93 Trillion into INDIA, to solve all the above. **I need Indian media houses to fully get onboard with this endeavor of bringing full 93 Trillion into INDIA.**

Solving the GREED problem – I define ‘Goal Year 2050’ for India – Unity in Diversity.

- By uniting India, reigniting ‘Unity in Diversity’; if all 1.32 Billion Indian citizens join forces and claim this wealth in a united voice (BY LAW), I will bring the full 93 Trillion into this country.
- **So, solving the problem of GREED is by defining the demands, needs of INDIA as a country and claiming all wealth of my invention into this country. I intend to achieve ‘Goal Year 2050 for India’ – A visionary goal to make India a developed country by year 2050.** This will enable us to:
 - Build at least FIVE world class super cities like say Hong Kong.
 - Realize the full vision of 100 smart cities.
 - Realize the vision of 1000 airports.
 - Eliminate poverty in India and secure the future of 1.32 Billion Indian citizens.
 - Bring in advanced technologies into Education, Healthcare and agriculture sectors.
 - We can achieve a lot more.
- **THIS IS HOW I HAVE SOLVED THE GREED IN MULTIPLE DIRECTIONS PROBLEM. BRING FOCUS ON INDIA.**
- You tell me if there is another way we can stream-line this greed? Of 93 Trillion invention dropped in the center of 193 countries?

What do these transformations mean to India and World? REAL FREEDOM, progress & development.

World

Project Earthling© delivers true freedom and equality to all 193 World nations.

It delivers trade and economic freedom to all 193 World nations.

Bring a better and more efficient global governance structure in a Group-Influential 50 model (GI-50).

The international territories will become more law abiding.

Provide economic growth, progress & development opportunities to all 193 nations.

Adoption of my invention - Vehicle Color Change Technology by world countries to drive economic growth for themselves.

India

Drive Progress & Development in India.

Get India's GDP to about 20 Trillion in a couple decades from now.

Build India's own national treasury of 93 Trillion in Earthlings currency.

Make India a developed country by year 2050.

Eliminate poverty, secure future of all Indian citizens.

Build 5 Super cities, realize 100 smart cities and 1000 airports.

Bring high end technology into key sectors of India.

Cool Cars – The 93 Trillion Global Problem

Vehicle Color Change
Technology Invention

Creates 1500 to 2000 trillion worth economic activity in next 100 years.

Reset Global Economics & Enable New World Order

Enabling colorful times

The INVENTION.

In Q1 – 2007, I bought my third used silver car while in USA. This was due to lack of funds to buy a new car in the color of my choice. Used car market is very prominent in USA, unlike in India. Having had enough of driving Silver cars, I wanted to get the color changed, however it seemed to be an expensive job. That's when I solve the problem of 'Vehicle Color Change'; which automotive industry has tried to crack, since the industry inception, nearly 120 years before. This caused greed of 93 Trillion across World and resulted in many events.

19 January 2020

Reset Global Economics & Enable New World Order

Enabling colorful times

The INVENTION – Let's watch a video giving simple conceptual view.

- Let's watch a video. You saw a simple visual (to the inventive concept) which I shot on a toy car in year 2014.
- **The video is purely for visualization of the invention only.**
- The real-World implementation of the technology will need the following upgrades:
 - The plastic covers used will be replaced by specially designed 'Two-layer polymer system', each layer having its own set of chemical additives to deliver unique set of properties to each layer.
 - Outer layer will be (approximate) 0.5 mm gauge transparent polymer sheet with hydrophobic coating on both sides.
 - Inner layer will be regular thin polymer sheet with hydrophobic coating.
 - Each of the 12-13 'Two-layer polymer systems' (for 12-13 exterior car panels) will have micro-valves to couple with conduits that will allow draining of the color, cleaning of the interior space, drying and reinjecting a new color of your choice from 1800 shades (or full spectrum) available in market.
 - You could change the color in under 10 minutes.
- Color change mechanism could be:
 - Manual may take 20 to 30 minutes.
 - Robotic system will deliver an entire car color change in under 10 minutes.

Automated color change Robotic method – Visual representation.

- Color change mechanism could be:
 - Manual may take 20 to 30 minutes.
 - Robotic system will deliver an entire car color change in under 10 minutes.

How much paint is needed? To change the color of cool car once.

- From the total volume, we have to adjust for the windows, windshields, tires, ground clearance, adjustments for sedan shape.
- By adjusting for these, the more accurate computation is at 60% of total volume computed.
- We believe an optimum vest enclosed space thickness is between 0.1 to 0.5 mm.
- Which means, a single-color change would need anywhere between 1.5 to 7 liters of paint.

Volume in liters	Vest width		
	1 mm	2 mm	5 mm
Rounded numbers			
Side 1	7.2	14.4	36
Side 2	7.2	14.4	36
Top	9.1	18.2	45
Total Volume	23.5	47	117

Vest space thickness	Total volume	@60% of total volume
In mm	In Liters	In Liters
5	117	70.2
2	47	28.2
1	23.5	14.1
0.5	11.75	7.05
0.4	9.4	5.64
0.3	7.05	4.23
0.2	4.7	2.82
0.1	2.35	1.41
0.01	0.235	0.141
(Micron) 0.001	0.0235	0.0141

A typical Sedan	Length	Width	Height
In Inches	192	73	58
In Centimeters	487.68	185.42	147.32
In Meters	4.9	1.85	1.5

Color Changing Technology

Other applications.

- Outside the Automotive industry, following sectors can use the 'Cool Technology', for personalization needs, choice of consumers.
- Other secondary sectors (markets) related to Interior Décor are listed here in descending order of revenue potential:
 - Walls Sector: For odd walls in houses and offices.
 - Thermal Insulation of buildings in countries with extreme weather conditions is an exemplary application to the invention, in which insulating material could be used instead of color or paint.
 - Electrical appliances sector: Refrigerators, other home or office appliances.
 - Electronics sector: TV, Computers, laptops, smartphones, other handheld devices.
 - Furniture sector: Sofa set, bed, dining set, other.
 - Decorative articles sector.
- Other miscellaneous tertiary sector: May include shoes, toys, etc.

Business opportunities From the color changing technology.

- The Color changing technology for Cool Cars has tremendous business opportunities, for the following industries. The top 5 have the maximum potential:
 - Automotive industry. It is transformative to the industry.
 - Plastics / Polymers industry. Massive opportunity to make transparent polymer sheets for automobile industry.
 - Paints industry: Spike in demand to make specialized paints for Cool cars.
 - Robotics automation industry: Demand for robots and automation solutions will rise, to enable color change.
 - Chemicals / Additives industry. Will also see significant demand increase; due to making two-layer systems and paints with special properties.
 - Automotive insurance business and valves business will also grow.
 - Additionally, demand for raw material, supply chain businesses (suppliers), will see dramatic increase in revenue and growth.

What does it mean to the World? Against various parameters.

Automobile industry parameter	Current car industry	Cool car solution
Fixed manufacturing plant cost	High	30% lower
Transportation costs	High	Lower and reduced.
Inventory management	Complex, by color	Completely simplified (only by model and not by color)
Dealership stocking	Complex, by color	Completely simplified (only by model and not by color)
Unit painting cost	\$ABC	At least 10% lower
Repainting cost	Exorbitant and non-repeatable	Affordable and highly repeatable
Consumer expression	Limited to no expression change	Can be as expressive as the consumer wants
Color change at will	Not possible	Totally possible - done under 10 minutes
Surface finish, texture, touch and feel change	Not possible	Totally possible - vest replacement - a days job
Match car color to outfit for party	Not possible	Totally possible - match in 10 minutes
Creative coloring	Not possible	Any combination of colors can be used. E.g., India flag colors, USA flag colors – RWB, doors in one color, bonnet and bumpers in another color.
Accident diagnostics and forensics	Difficult but doable	Impact reconstruction is simple and easy
Impact to economy (national and global)	Normal status quo	Significant positive boost for economic growth
Promotes and encourages small businesses	Normal status quo	Plenty of opportunities for large, SME and new entrepreneurs

19 January 2020

Reset Global Economics & Enable New World Order

Enabling colorful times

What does it mean to the World? Against various parameters.

Based on the benefits listed, I predict that the automobile industry will readily evolve and adopt this next generation solution and build 'Cool Cars'. Further, the solution delivers a boost to the industry economics. My prediction is that 90% or more of the passenger car market will migrate to this 'Cool car' solution within the next decade. A small percentage may remain in current method of painting e.g.: One plant by manufacturer continue to use conventional paint. Further, the solution may be adopted by a small percentage of commercial vehicle segment of automobiles as well.

Automobile industry parameter	Current car industry	Cool car solution
Global energy balance	Normal status quo	Much better. Crude consumption increases, encouraging alternate energy sources to be used to run the cars. E.g., success of electric cars, hybrid cars.
Impact to automobile industry	Normal status quo	Very positive. Cuts plant cost (by 30%), painting costs (by 10%), transportation costs, provides significant operational cost savings, improves profits (by 25% to 40%), improves customer satisfaction, streamlines or simplifies the business processes and steps.
Impact to world	Normal status quo	Very very positive. Global economics, regional economics and individual country or national economics would all be stimulated for growth, jobs and businesses would be created and the world would improve for better. Global trade would receive significant boost.
People sophistication levels	Normal status quo	Will improve profoundly. As robotics comes into mainstream across the world, for changing car colors.
Downstream businesses	Normal status quo	Tremendous scope for other businesses. E.g., Plastic sales, Chemicals / additives sales, paints sales, valve manufacturers, materials scientists, robotic solutions, electronics and other
Job creation across world	Normal status quo	Significant increase in the number of jobs that would be created.

Reset Global Economics & Enable New World Order

Enabling colorful times

Cool Cars – The 93 Trillion Global Problem

USA commits 'GLOBAL FRAUD', to block
wealth from me and India

***O. S. 4961 of 2018 in Bangalore City Civil Court.
Global lawsuit linking 62 countries.***

Reset Global Economics & Enable New World Order

Enabling colorful times

93 Trillion sale price for global IP rights of the invention.

110 to 125 Trillion – 10% of realistic projected economic activity numbers (for next 100 years). Could be claimed by me & India.

93 Trillion – 10% of conservative realistic projected economic activity numbers. What we are claiming will be accepted by all World nations.

200 to 250 Trillion – 10% of aggressive numbers with strong sector growth rates and higher inflation (currency depreciation) numbers factored in.

The 93 Trillion claim at Conservative Realistic number will be approved, endorsed by all world countries, for me and thus India to cash out with. Hence, I decided and fixed global rights sale price at 93 Trillion.

Remember that if anyone were to challenge 93 Trillion claim, I can claim 125 Trillion and justify that claim statistically.

100 YEARS ECONOMIC ACTIVITY DIVIDED BY GEOGRAPHY – All sectors.

REGION	COUNTRY	100 YEAR ECONOMIC ACTIVITY SIZE = CONTROL OF DOWNSTREAM BUSINESSES (T \$) - Approximate
NA	USA	225 T
NA	Canada	45 T
NA	Mexico	15 T
EU + UK	38 Countries	270 T
Asia	Japan	120 T
Asia	Korea	75 T
ANZ	ANZ (<u>2 applications</u>)	45 T
Other	BRICS and Others (<u>10 applications in all</u>)	135 T
	<u>Grand Total</u>	<u>930 T – (Total of estimated projections)</u>

Note – T \$ is Trillion \$, wherein a Trillion is 1000 Billion.
These are Conservative – Realistic values or numbers.
Claiming 10% as sale price.

How were the estimates done.

I have captured industry data by having analysts work for nearly two years.

Market size data, sales volume data of Automotive industry by country has been captured.

Other sectors and their market sizes have also been captured.

The multiplication of:

62 countries where I have sought IP rights protection; by

The market sizes of the following sectors in each of these 62 countries: Automotive, Walls for Thermal Insulation, For Interior décor – Walls, Electrical appliances, Electronic devices, Furniture;

For other miscellaneous – Shoes, toys; by

Products required to enable technology for each sector, which includes polymer-plastic two-layer systems, robotic stations, chemicals/additives required, paints or colors, vehicle insurance; by

Services generated for offering color change for each sector, which includes color change services, repair or replace two-layer polymer systems; by

Supply chain of businesses to be built to enable the products; by

the 100-year activity projection of all the above; by

the conservative market size growth rate; by

the inflation due to economic growth rate (currency depreciation);

Will give numbers in the range of 1500 to 2500 Trillion. **930 Trillion, a conservative realistic number has been chosen, which will be an undisputed and fully accepted number by world nations.**

Sample extrapolation of 100 years activity for Automotive Industry.

2017 Global automotive market size is an approximate 1.8 Trillion \$ market.

At an average 1.8% market size growth, the automotive industry sales alone will be about 495 Trillion in 100 years; in 2020 \$s (USD).

At an average 2% market size growth, the automotive industry sales alone will be about 562 Trillion in 100 years; in 2020 \$s (USD).

When you bring in the currency depreciation over 100 years; the adjusted values of the market size over the 100 years will be 1,486 Trillion at 1.8% average growth. And 1,686 Trillion at 2% average growth.

These are arrived by simply tripling the value.

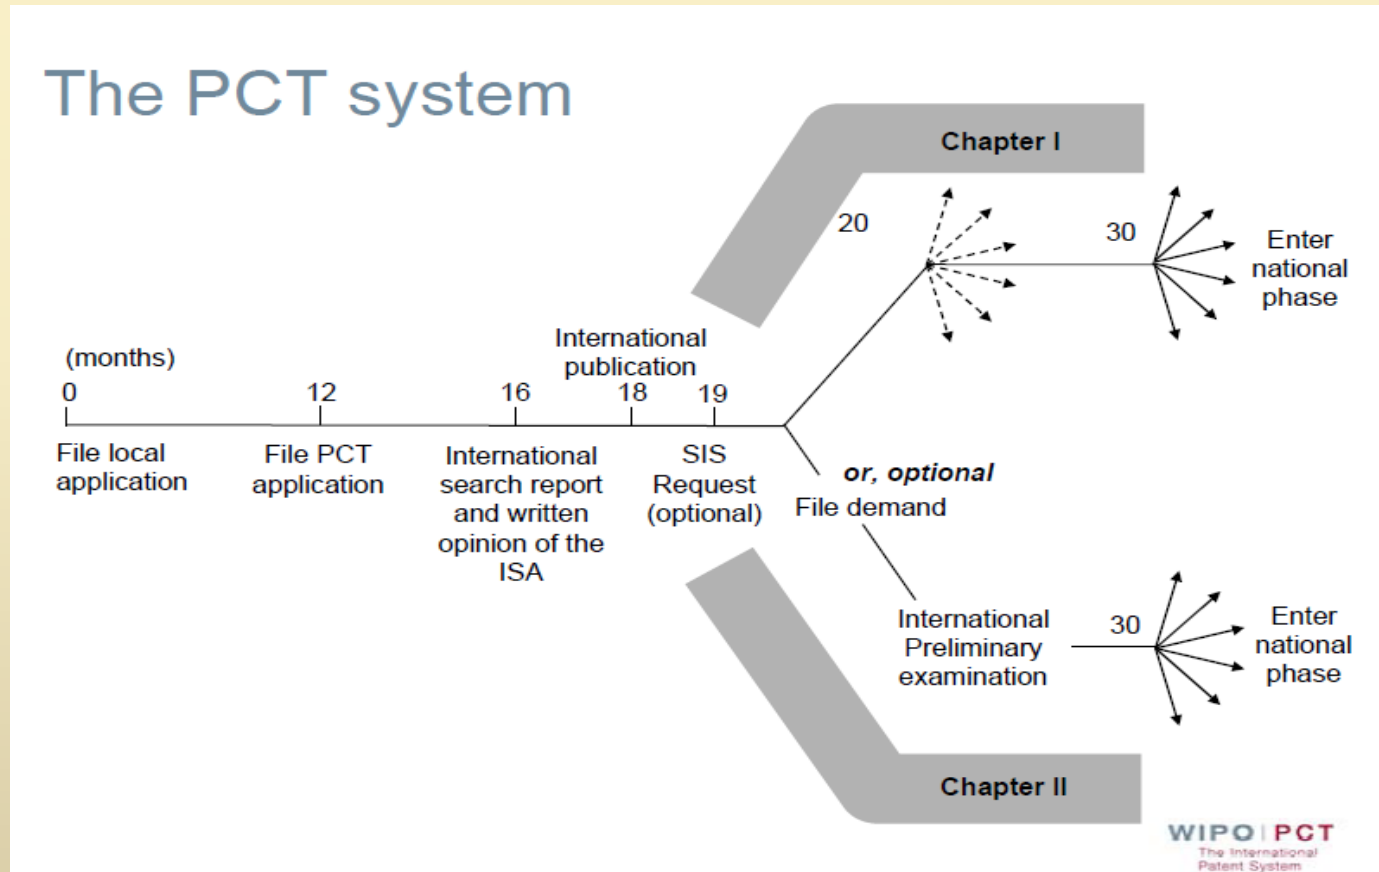

The comparative examples for this are:

- What could 100 Rupees buy in year 1950 versus what it could buy in year 2050?
- What was the sale price of Maruti 800 or Omni in year 1980 versus what is its sale price today in year 2020?

Just the automotive sector alone comes to around 1,500 Trillion value. When you factor in everything else listed in previous slides, you will realize that the technology will easily drive economic activity of 2000 to 2500 Trillion in the next 100 years.

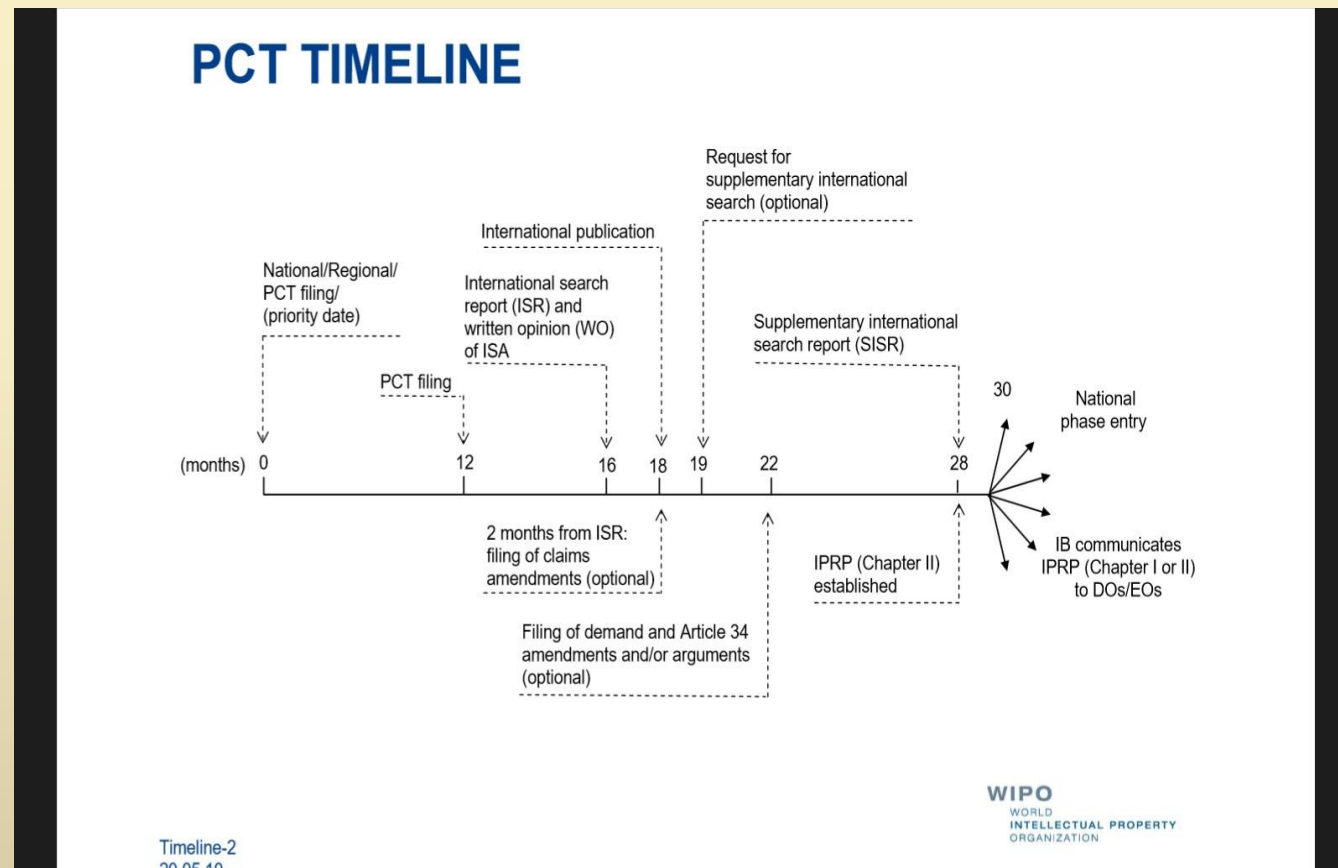

Given this, my claim of 93 Trillion as final global rights sale price is more than reasonable. And will be globally accepted.

View of PCT application process. PCT – Patent Cooperation Treaty signed by 152 countries.

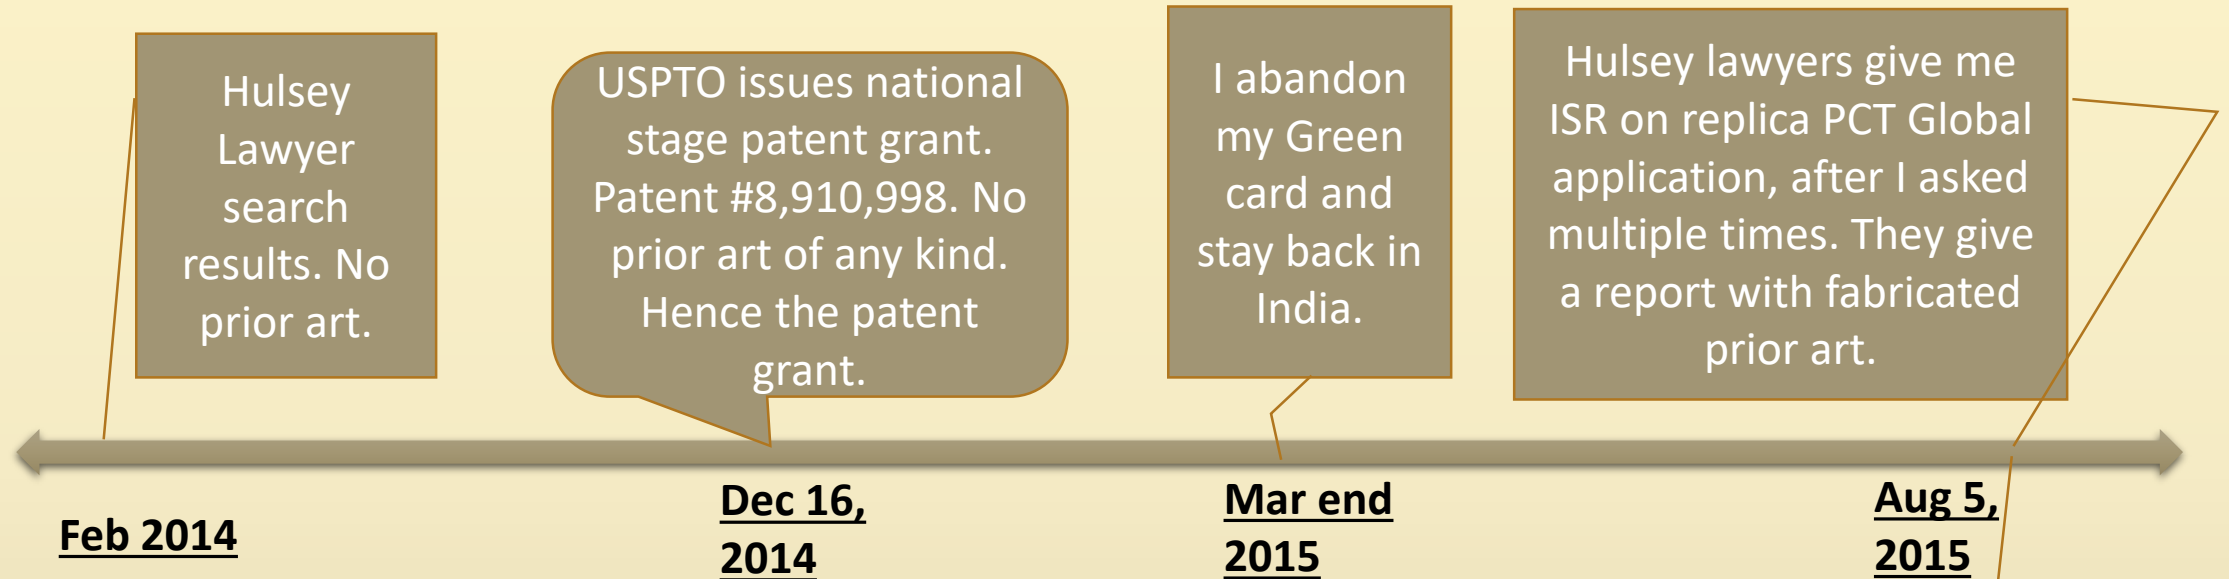

- The Patent Cooperation Treaty is signed by about 152 countries in the World.
- India also signed the PCT in the 1990's.
- By virtue of the treaty, an inventor from any of the PCT contracting states (any of the 152 countries which signed the Treaty), is entitled to seek and obtain his invention patent rights and protection across all the PCT contracting states.
- USA has no respect to PCT the treaty.
- **USA has attempted to breach the global treaty, PCT.**

View of PCT application process – Indicates USA global fraud.

- I bring the attention of media houses to the number 16 in the chart.
- As per PCT procedure and timeline, the International Search Report (ISR) and Written opinion (WO) of ISA are established at the 16th month point.
- While Hulse lawyer delivers the report to me after my repeated asking at after the 16th month point, it is dated with 9 months prior date, Nov 4, 2014; indicating the deliberate fraud clearly.
- Further the report showed a 2-month response window which was long expired. IP lawyers by law must deliver PTO communications on time, when there is a defined response window.

Simple view of the USA global fraud.

As per PCT process, ISR on PCT application is established in the 16th month. How is the report dated Nov 4 (ISR established with in 7 months?), and yet delivered in August 2015. Fraud is visible to the entire World.

IP lawyers, are bound to deliver PTO communications on time. Especially when there is a two-month window to respond back. Hulsey lawyer's broke law by not complying to IP law protocol that IP lawyers follow.

The fabricated report further is dated Nov 4, 2014 with a 2-month window to respond back to PTO. Now long gone in past. Their prior art fabrication to block global IP rights and related wealth from me and India, is proven beyond any reasonable doubt.

USA's Fraud Summary – Their global fraud is OS 4961 of 2018 in Bangalore City Civil Court.

VEHICLE COLOR CHANGE TECHNOLOGY LAWSUIT – OS 4961 of 2018 in BANGALORE CITY CIVIL COURT IS A TRULY GLOBAL LAWSUIT; CONNECTING 62 COUNTRY IP RIGHTS TO THE INVENTION AND TECHNOLOGY

A TRULY GLOBAL LAWSUIT. 62 countries IP rights are linked to this lawsuit.

USA has BLOCKED:

- the global adoption of my invention and technology, which would give a boost to global economy.
- the economic stimulation prospects of 61 non-USA countries from adopting the invention and technology.
- India's Progress & Development prospects (e.g., Build five super cities like say Hong Kong. Realize 100 Smart cities. Realize 1000 airports).
- 1.32 Billion Indian citizens future (Eliminate Poverty, Invest and improve Education sector, Healthcare sector and bring high end technology to Indian Agriculture sector).

Summary of Fraud: Collectively USA, grants a patent to the invention and technology for USA territory (USA national application), valued at 22.5 Trillion \$ - Earthlings.

In a deliberate GLOBAL FRAUD, they fabricate prior art Cobb, Price, Saenger & Hale, and issue a created, fabricated, sabotaging ISR (International Search report) on the replica PCT global application; thus denying the inventor and INDIA, the global IP rights and the related wealth, valued at 70.5 Trillion \$ - Earthlings, from 61 non-USA PCT countries or contracting states.

This was done because the inventor is an Indian citizen and they wanted to BLOCK THE WEALTH FROM COMING INTO INDIA. They are BLOCKING INDIA'S Progress & Development, Peace & Prosperity and the future of 1.32 Billion Indian citizens, by this global fraud.

61 non-USA countries (covered by 17 national stage applications referring to the PCT application), the IP rights of which are affected by USA's Global Fraud are:

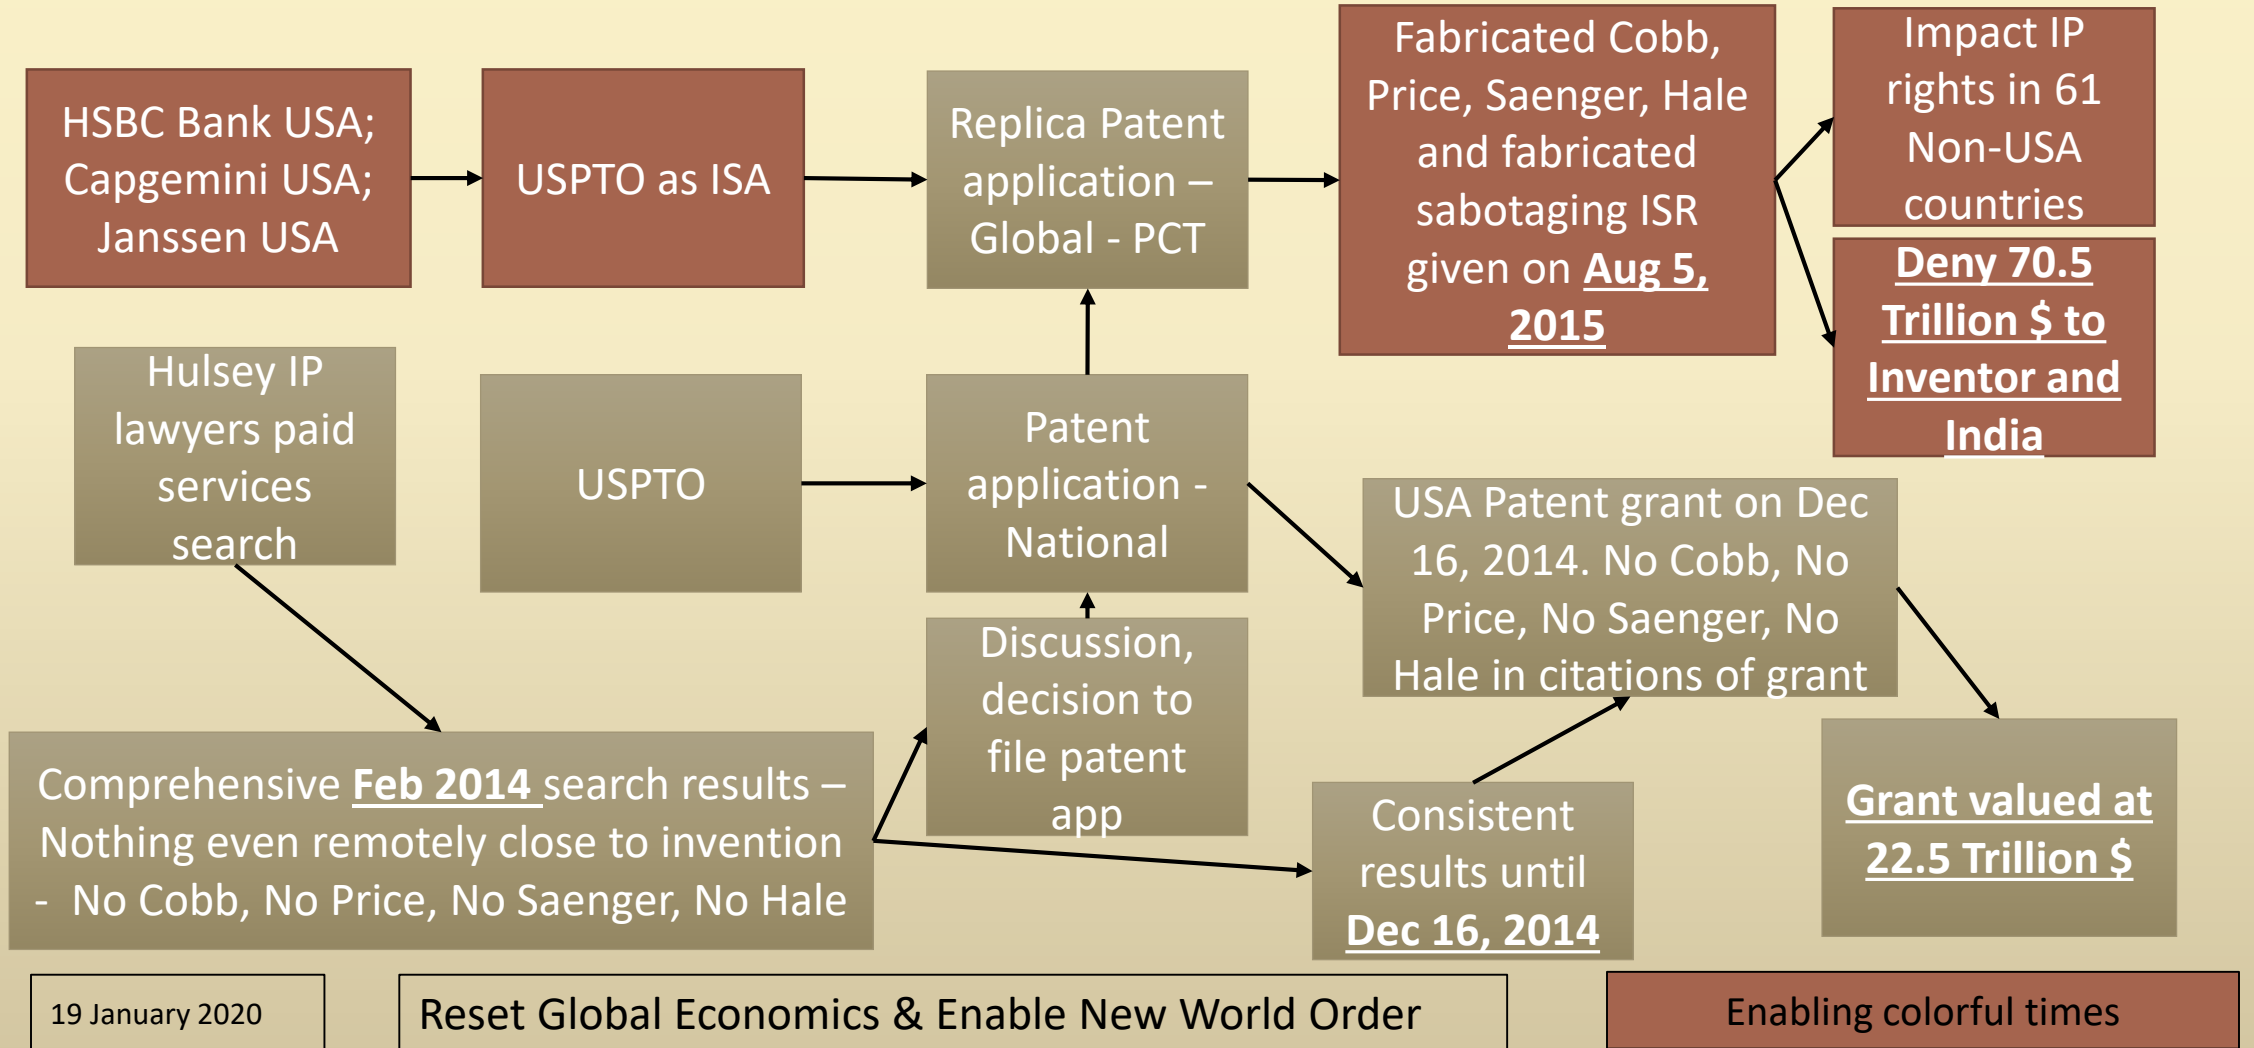

India, Canada, Mexico, Japan, South Korea, Australia, New Zealand, Brazil, China, South Africa, Thailand, Philippines, Nigeria, Malaysia, Indonesia, Eurasia PTO jurisdiction or Trade Union covering 8 countries (Armenia, Azerbaijan, Belarus, Kazakhstan, Kyrgyzstan, Russian Federation, Tajikistan, Turkmenistan), and European PTO jurisdiction or European Commission / Union covering 38 countries (Albania, Austria, Belgium, Bulgaria, Croatia, Cyprus, Czechia, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Monaco, Netherlands, Norway, Poland, Portugal, Romania, San Marino, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, the former Yugoslav Republic of Macedonia, Turkey and United Kingdom),

with the following as other "Effecting Parties" or "Observing Parties" or "Related Parties" to the lawsuit:

WIPO (World Intellectual Property Organization that governs PCT, the Treaty), WTO (World Trade Organization), United Nations Secretary General delegate / representation, United Nations General Assembly representation, United Nations Security Council representation, United Nations Economic and Social Council representation, United Nations Trusteeship Council representation, United Nations Secretariat representation, United Nations International Court of Justice (ICJ) representation, United Nations Geneva representation, OPEC (Organization of the Petroleum Exporting Countries) and Saudi Arabia or their Kingdom delegate / representation.

- In a globally visible fraud, USA (four defendants in court case) and USPTO, deliver two outcomes on the same exact replica applications. They give a grant on national stage USA application, and block my invention global IP rights (61 Non-USA country rights pointing to my PCT application) in a deliberate fraud by fabricating prior art.
 - My patent lawyer search results of the invention showed no prior art. This was done in Feb 2014.
 - USPTO themselves grant the national USA patent in Dec 2014. The grant was given as there was no prior art.
 - On a replica (same exact) PCT application covering my global rights for 61 Non-USA countries, the same USPTO issues a fabricated ISR (International Search report) with fabricated, created prior art of Cobb, Price, Saenger & Hale in August 2015.
 - The above was done, as I abandoned my 'Green Card' by March end of 2015; declaring that I will live in India. That's when, to block wealth from coming to me, an Indian citizen and India, they fabricate the prior art.
 - Prior art that did not exist in Feb 2014, Dec 2014, shows up in Aug 2015, after I abandoned my Green Card.
 - And they are further exposed, as the report was given to me in Aug 2015, with fabricated past date of Nov 4, 2014; with a 2-month window to respond back, that was gone in past. Patent lawyers broke IP law protocol. They are caught.

View of fraud pertaining to 'Vehicle Color change technology invention'.

Fact sheet – Timeline of the lawsuit.

DATE	ACTIVITY / COMMENTS
Feb 17, 2014	D4 states Search fee price as \$1,000
Feb 18, 2014	Inventor pays the fees by check
Feb 26, 2014	D4 provides search report and closest prior art – 7 citations (No Cobb, No Price, No Saenger, No Hale as they did not exist). Convinced that there is no prior art; Inventor filed the application
Mar 27, 2014	USA National stage application is filed with USPTO
July 15, 2014	D4 files PCT application (exact replica of USA national app); with USPTO as RO/ISA. D4 is obligated to report communications from PTO within a week to 10 days, by law.
Dec 16, 2014	USPTO patent grant. Patent references include 7 citations by D4. Search results correct / consistent. (No Cobb, No Price, No Saenger, No Hale in Patent citations, as they did not exist).
March end, 2015	Inventor abandons 'USA Green Card', processed by D3; thus communicating he would live in India for the rest of his life. They did not want the wealth from PCT countries to come to INDIA. That's when they decided to commit the global fraud, to target PCT application by fabricating prior art.
July 15, 29, 31; 2015	Inventor sends reminders asking for ISR on PCT application.
Aug 5, 2015	D4 mails ISR with Nov 4, 2014 date; with a 2-month deadline (long gone in the past) to respond back.
Aug 5, 7; 2015	Inventor questions the foul play by D4 asking why the ISR was not delivered in Nov 2014?
TRUTH	Report was in reality created in July/Aug 2015, as creating/fabricating the prior art Cobb, Price, Saenger, Hale took months after March 2015 (GC abandoned). So, after fabricating the prior art, USPTO issues the sabotaging ISR.

Let's watch two videos on USA global fraud. USA-UK Versus the other 191 countries.

USA & UK

Rest of the
World – Other
191 countries

May oppose United Nations Global
Governance Model 2020©

May oppose Project Earthling©

They endorse United Nations
Global Governance Model 2020©
going LIVE.

They endorse Project Earthling©
going LIVE.

They endorse me & India claiming
93 Trillion – Conservative realistic
estimate for my invention.

Recognize the global fraud of USA.
They support me, my invention and
its adoption globally.

- I have presented the true facts to the media houses, to all Indian citizens, world citizens and all 191 other world countries. The global fraud committed by USA is for everyone to see.
 - All 191 non-USA, non-UK countries will support me & India, as they have seen the global fraud committed by USA.
- I have claimed a conservative-realistic number of 93 Trillion (Earthlings) as my global IP rights sale price to bring into India.
 - All 191 non-USA, non-UK countries will support my claim and India's claim of the 93 Trillion. They understand that myself and India can easily claim 125 Trillion also.
- I am delivering True economic & trade equality; Real economic & trade freedom to all world countries.
 - All 191 non-USA, non-UK countries will support my global Macro-Economic & global Banking reform - Project Earthling© and its go LIVE date of Jan 1st, 2021.
- I am delivering much better, much superior, much more equitable global governance structure.
 - All 191 non-USA, non-UK countries will support my New World Order reform - United Nations Global Governance Model 2020© and its go LIVE by Jan 1st, 2022.

Reset Global Economics & Enable New World Order

Enabling colorful times

Objective of this media disclosure.

To make media and all of India aware of facts.

- To introduce the INVENTION & TECHNOLOGY to your subscribers & audience. To India and the World.
- To share the lawsuit fact set and the truth to your media houses.
- To make media and India aware of the facts related to the global fraud committed by USA to retain supremacy, control, power on Earth and stay the richest.
- As per Patent Cooperation Treaty & my Indian citizenship, I have legal rights by law to bring the wealth into this country.
- The LIVING WILL for 93 Trillion as executed by me already submitted to the Court, thus making all of India linked to this lawsuit. All India's future is linked to my invention & lawsuit.
- Media must make people all over the World aware of this fact set & truth.
- The lawsuit will be resolved in the Honorable Court. USA will admit their fraud and meet my prayer demands in the upcoming court date.

Q & A

Nigeria	Grant ^	0.15 T
South Africa	Grant *	0.45 T
Total value of invention (as sale price) - ^* Due to partial territories left, their value is diminished and hence it is full liability to defendants now		93 Trillion \$

- **In all the 93 Trillion value is broken down into 18 sale agreements or deals, as there are a total of 18 global IP applications.**
- The first step is for USA to resolve their fraud. USA territory is valued at 22.5 Trillion USD. This deal must complete first by resolving the fraud in the court in lawsuit 4961 of 2018.
- Then the other 17 global Non-USA country sale agreements (valued at 70.5 Trillion Earthlings) must be executed in a “TRI-PARTY AGREEMENT” model.
- Each of the **17 TRI-PARTY AGREEMENTS** involve:
 - Me as Inventor & Seller of IP rights
 - The PTO jurisdiction or the country government as the Buyer of IP rights
 - GEC (Global Earthling Council) as the Printer and Payor for the sale deal.
- The 93 Trillion Earthlings value will be brought in by executing 18 sale agreements or contracts.
- **TAKING PROJECT EARTHLING© LIVE IS HOWEVER INTEGRAL TO COMPLETING THESE 18 LARGEST DEALS IN THE WORLD.**
- After USA clears their fraud and pays for their territory @ 22.5 Trillion in \$’s; GEC will be taken LIVE and the other 17 deals (valued at 70.5 Trillion) will be executed in Earthlings currency.

I Executed my LIVING WILL for 93 Trillion and pledged 90% of it for India – Goal Year 2050.

Document Y (2 Pages)

LIVING WILL
OF MR. SRINIVAS DEVATHI S: BANGALORE - 560070, INDIA
WILL TAKING EFFECT FROM – SEP 16, 2019
WILL EXPIRING ON – DEC 31, 2020

CONTEXT:
I, Srinivas Devathi, inventor to 'Vehicle Color Change Technology' with patent grant from USPTO (which is valued at 22.5 Trillion Earthlings/\$) and the technologies valuation from the other 61 Non-USA countries (all of which are valued at 70.5 Trillion Earthlings/\$); own total assets (all intellectual property) worth a total (realistic estimated value) of 93 Trillion Earthlings/\$; as of today. This is the most important asset that must be addressed in this Will. It is fair to say that all my property / assets / wealth is intellectual property in the form of patents, patent applications and Trademarks.
Outside of the above listed intellectual property assets; I have some property and income from other regular sources which allows me to live my regular 'Middle class' income life in India. This property is nothing that anyone in India, or certainly USA citizens or their corporations would envy about or look to steal from me.

NO LEGAL HEIRS:
I, Srinivas Devathi, do not have any legal heirs. I am single (Divorce concluded in July 2012) with no children. So, I do not have any legal heirs; as all intellectual property in a person's name qualifies as his own earnings and any legal heirs of such property can only be his family descendants.
Further, my siblings have no legal claim in this wealth either.
My father, who passed away on Jan 1st, 2018; has left enough (of his wealth) for my mother, to ensure her comfortable living for many years to come. Additionally, my mother would not know what to do with crores of rupees, and certainly does not know what to do with Trillions of Earthlings / \$.
Despite my mentioning of the names of my Father or Mother in one or more financial instrument forms (such as bank accounts, LIC policies, Post office accounts, investment accounts, or other) as my nominee (for that financial instrument), this 'Living Will' shall override any such nomination forms being extrapolated for my intellectual property assets listed above. Further, intellectual property is not something that is claimed or inherited upwards in the family tree.
So, neither my mother nor my deceased Father can inherit or claim any portion of the 93 Trillion Earthlings / \$ asset.

SEPARATE INSTRUMENT:
In summary I do not have any legal heirs for the 93 Trillion Earthlings / \$ valued Intellectual Property. If I choose to assign anything to my Mother or siblings, it shall be done so only by 'Executing a separate contract or agreement or legal instrument'.

Page 1 of 2

Living Will Continued

CURRENT ASSIGNMENTS OF WEALTH FROM INTELLECTUAL PROPERTY:
The 93 Trillion Earthlings / \$ will be brought into India as my wealth in this year and next. Depending on the way I execute contracts (invention – Intellectual Property sale agreements) with one or more countries; I may attract the wealth in partial payments spread over the IP tenure which ends in year 2034. As the wealth comes into my Indian Bank account(s), my yearly allocation of funds will be as given here:

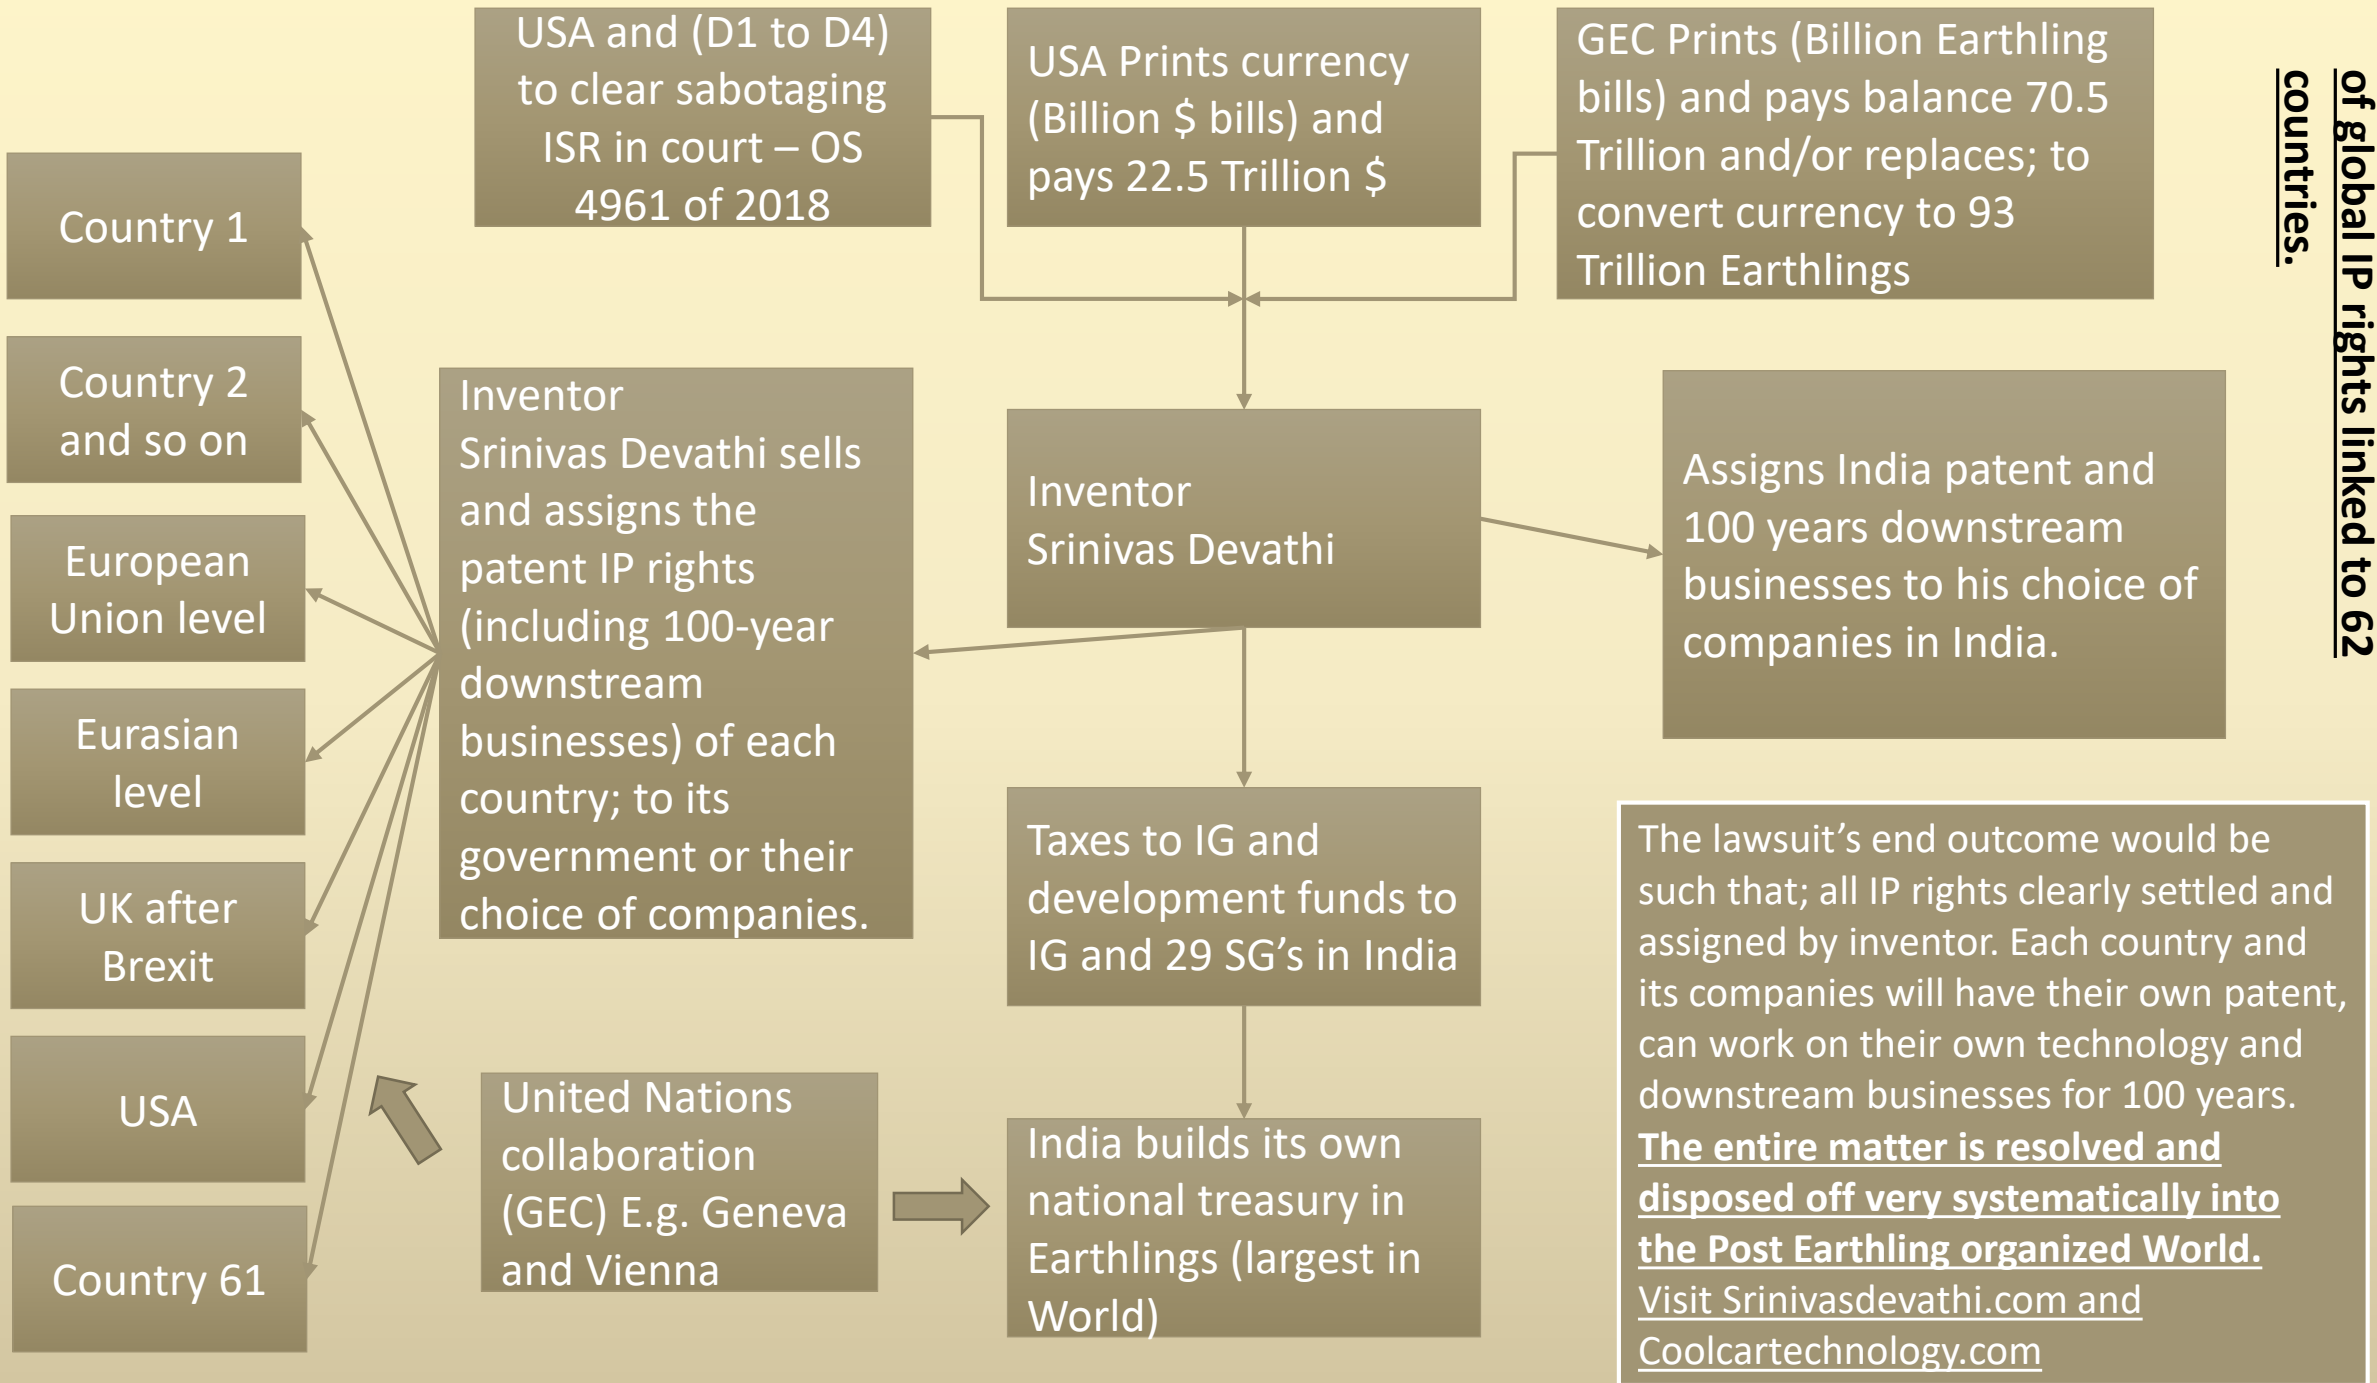

- 90% of all wealth attracted will be 'year-marked' or 'pledged' for a visionary goal defined by me called 'Goal Year 2050'; to make India a developed country.
 - Half of this 90% (45% of total) will be paid to Indian Government (which includes all payable taxes at central government and state government level for all 29 states and UT's included). Portion / balance outside the taxes and up to the 45% of total value will be allocated to Indian Government and 29 State Governments as 'Development Funds' (for the states, in proportion to their population).
 - I shall annually pay (or distribute) this portion of wealth and provide guidance to Indian Government and all 29 State Governments on doing the right projects, the right way until 'Goal year 2050' is achieved.
 - The other half of this 90% (45% of total) is 'year-marked' or 'pledged' for Private side development projects / work which will be driven by me across India (which will further be followed and possibly emulated by many other developing and economically backward countries); through 'Earthling Foundations'. The legal entity Foundation is expected to be formed and its first initiative rolled out well before Dec 31, 2020.
 - Earthling Foundations will roll out a series of initiatives over the next 30 years, with allocated expenditure annually for projects that must be completed within that year; to achieve 'Goal year 2050'.
- 10% of all wealth attracted will be 'My personal wealth' in my personal bank account and spent on my personal expenses and select personal projects across India.

I, Srinivas Devathi, inventor to 'Vehicle Color Change Technology'; state that this is my Current active Living Will and this is how I want the money allocated, while alive or dead.

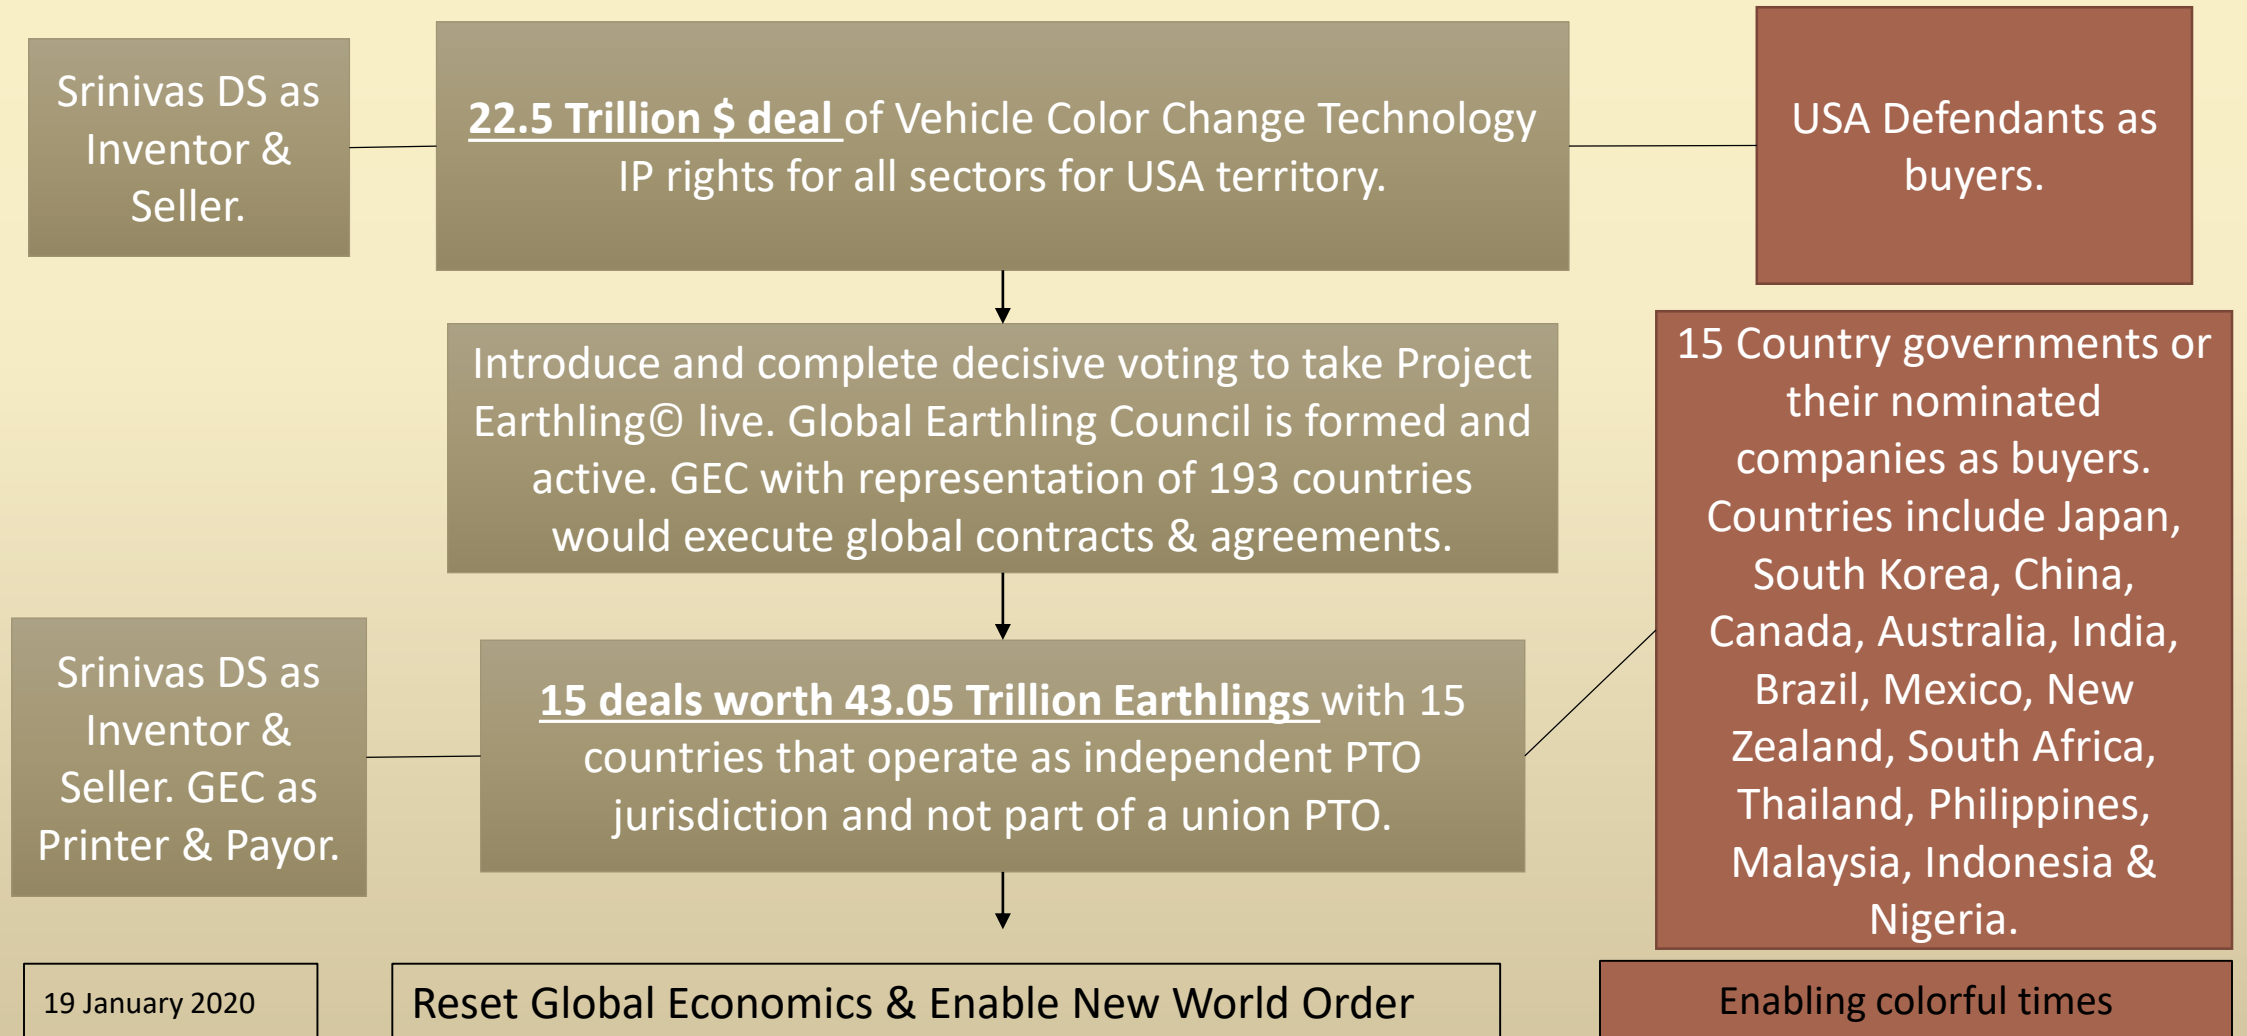

Srinivas Devathi S;
Inventor and Author;
Bangalore, India;
Sep 16, 2019.

- I have pledged and assigned 90% of all wealth from this invention, which is 93 Trillion to make India a developed country. To achieve Goal Year 2050.
 - 45% of it is pledged for Indian government and 29 state governments; to execute public sector projects.
 - 45% of it is pledged for private side initiatives to be executed across India via my earthling Foundations work.
- Thus:**
 - ALL OF INDIA IS JOINED IN THIS LAWSUIT.**
 - ALL 1.32 BILLION INDIAN CITIZENS ARE LINKED TO THIS LAWSUIT.**
 - ALL OF INDIA'S FUTURE IS LINKED TO THIS LAWSUIT.**
- I request media houses to present this to the entire World. LIVING WILL and future of India being linked to this lawsuit.**

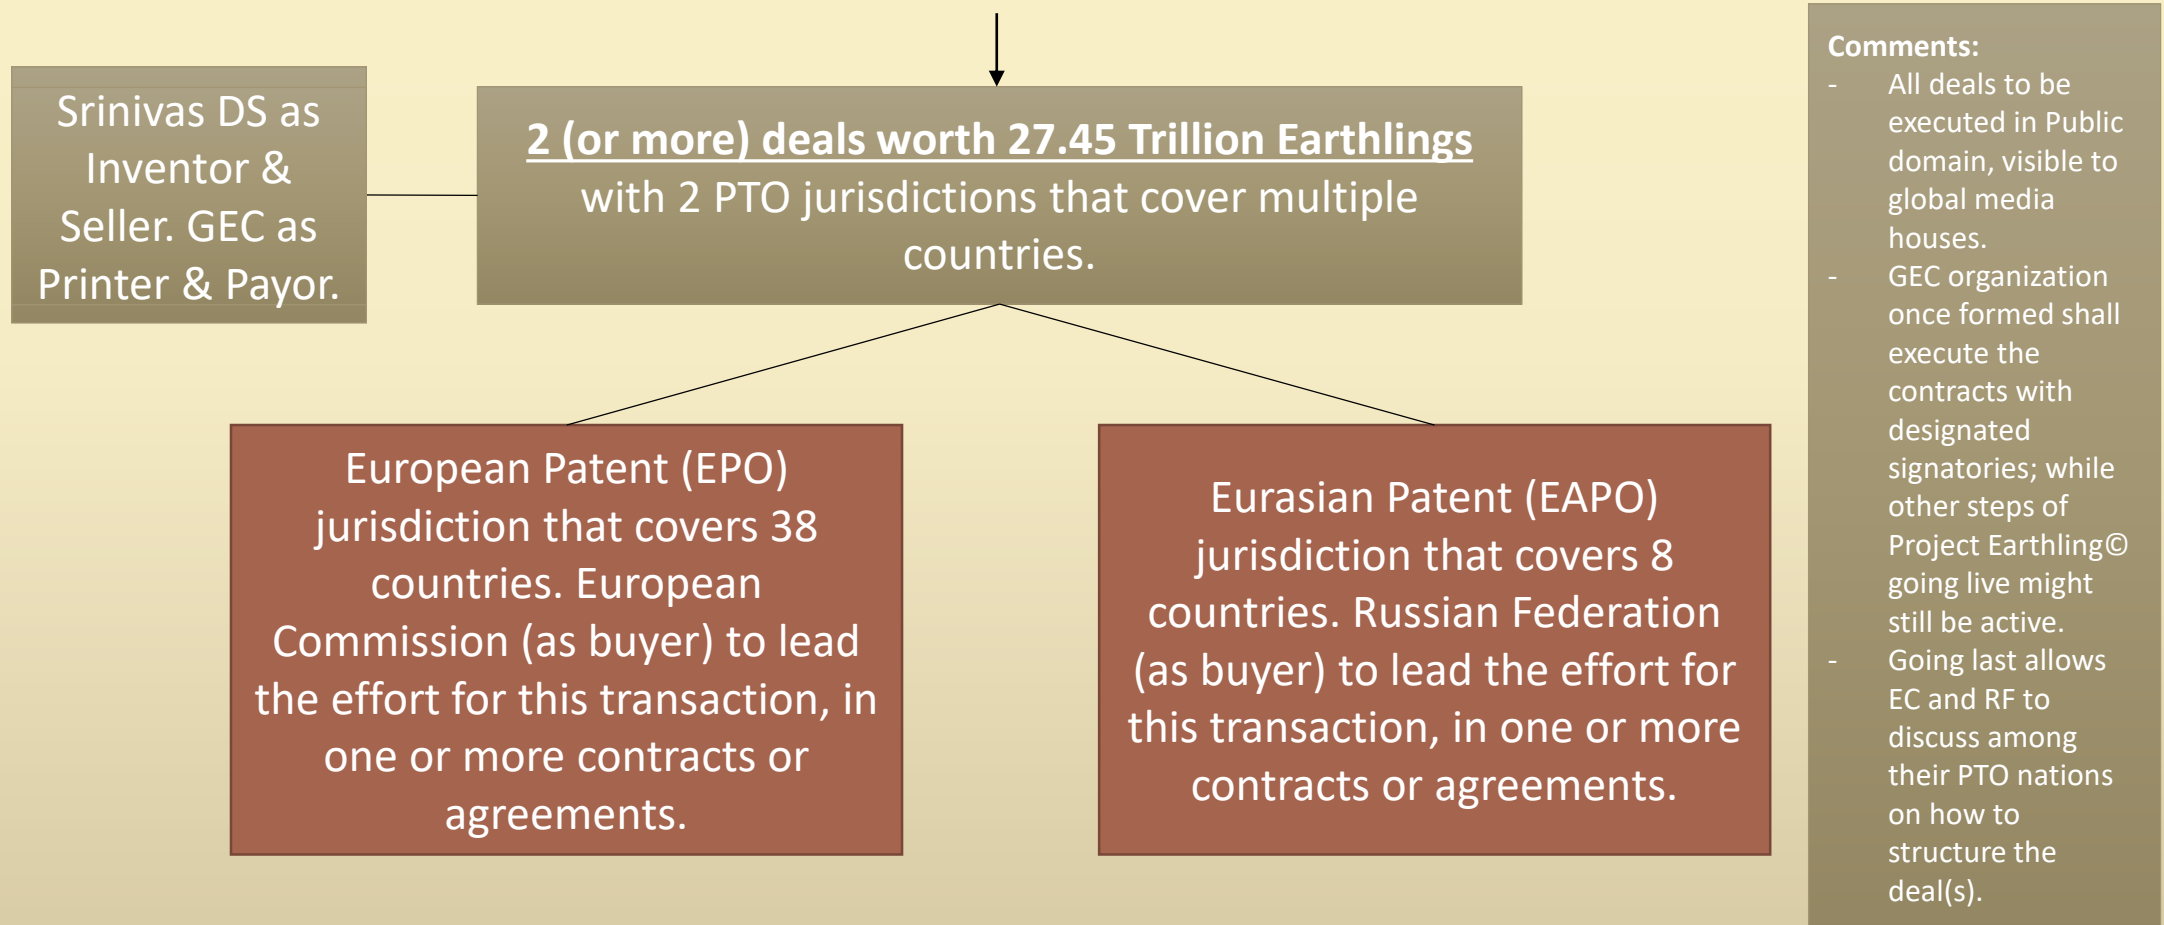

Steps or Process of resolution of global IP rights linked to 62 countries.

Sequence of deals as expected in year 2020 within next 12 months.

Sequence of deals as expected in year 2020 within next 12 months (Page continued).

Sequence of deals in year 2020. Srinivas Devathi's income by Financial years.

Srinivas Devathi's income to be realized in upcoming Financial Years:

- **In Indian FY 19-20**

- (Before March 31st, 2020) – **22.5 Trillion \$'s** realized, by USA deal execution with one time pay out.

- **In Indian FY 20-21**

- After decisive 193 country voting to take Project Earthling© live; GEC executes contracts between say June 2020 and Dec 31, 2020; despite other steps to take Project Earthling© going live being active until Dec 31, 2020.
- Technically Project Earthling© live event / global ceremony scheduled for Japan time 00:00 hours Jan 1st, 2021.

- **In Indian FY 20-21**

- (Between Jan 1st, 2021 – March 31st, 2021) 20% of contracted value of 17 other sale agreement(s) to be realized. **Valued at 20% of 70.5 Trillion = 14.1 Trillion Earthlings.**

- **For Indian FY's 21-35**

- The remaining **80% of 70.5 Trillion (56.4 Trillion)** is spread over **15 years** equal payments with say 0.5% GEC annual yield (Maximum GEC yield taken) built into the annual yield pay. **You will see break-up in subsequent slides.** All computations to be done up to 12th decimal point.

18 Upcoming Largest deals in the World, sorted by deal value.

Indonesia	Active ^	0.3 Trillion	Srinivas - Joko Deal	Joko Widodo
Nigeria	Grant ^	0.15 Trillion	Srinivas - Muhammadu Deal	Muhammadu Buhari
Total value of invention (as sale price) - ^* Due to partial territories left, their value is diminished and hence it is full liability to defendants now		93 Trillion \$ / Earthlings	After USA clears fraud, full value will be brought into India, by these 18 largest deals in the World which would cover 62 countries in all; building our own 93 Trillion Earthlings treasury.	

The Vehicle Color Change Technology has secondary applications in other sectors such as Interior décor (Furniture, walls, electronic devices, electrical appliances) and tertiary applications in other miscellaneous sectors (toys, shoes); and is fully Global in nature. It will be adopted world wide; will reach all 193 countries and 9.5 Billion people in the World. When the invention, its IP rights, 100-years worth downstream businesses are fully factored in, along with expected / projected sector(s) growth over 100-years and the related inflation due to economic growth; the economic activity numbers (related to the invention) globally reach unbelievable numbers like 2000 or even 2500 Trillion. This is based on an aggressive estimate. A realistic estimate of the economic activity will be in the range of 1100 to 1250 Trillion. I have gone with a conservative-realistic number of 930 Trillion worth economic activity in 100-years period, further claiming only 10% of that as Inventor and bringing that wealth into India. This number will be agreed to, accepted by and approved by all world nations. The above listed 18 LARGEST DEALS EVER IN THE WORLD will bring the wealth into India building our own National treasury of 93 Trillion in Earthlings currency. India will be the richest country by its treasury holdings within this year and next.

The sequence & break-down of 18 largest deals in the World to be executed.

		56,400,000,000,000	2,044,500,000,000	

- The 17 Tri-Party agreements will be executed with the following payment protocol:
 - 20% of the deal value paid out in the first year, in Earthlings currency.
 - The remaining 80% of the deal value will be spread over 15 years; paid out in Earthlings.
 - GEC will be the payor for these deals.
 - A standard GEC yield will be factored into the deals. I have shown a 0.5% annual yield paid by GEC on investments from world nations and me.
 - The contracts will reflect automatic adjustment of the highest yield to take effect if GEC were to provide higher yield than the mentioned 0.5%.
 - **As you can see the 15-year yield on the 80% value of the 17 deals is over 2 Trillion paid out over the 15 years.**

With 93 Trillion National Wealth, India must pass 'National Wealth Bill'.

- Up on these deals, and my attracting the 93 Trillion wealth into India; I will advise and work with Indian Government to pass **'India's National Wealth Bill'**.
- It could be a new bill, or an amendment to an existing bill. I will review and advise.
- The purpose of such a Bill primarily is:
 - To have Indian citizens, living in India and holding Indian passport to own the wealth that belongs to this country.
 - The above principle extends to all kinds and forms of wealth.
 - To have all Indian companies, corporations, Legal entities; owned by Indian citizens. At least majority share of 51% or more.
 - To not let the wealth leave the country for any reason other than imports or procurement.
 - The example of wealth leaving the country is; a heir to a Billionaire, when he/she chooses to settle in a foreign country by giving up Indian citizenship, he takes his inheritance wealth to the country he is immigrating into. This needs to be addressed in this Bill.
 - It is a different point that in the next couple decades no one would want to leave India.
 - The Bill's intent is to preserve our wealth in our country. And not let it leave India.
- I will not take any questions on the details of this Bill's content. It is early to divulge details of this Bill.

USA-UK Versus the other 191 countries.

USA & UK

Rest of the
World – Other
191 countries

May oppose United Nations Global
Governance Model 2020©

May oppose Project Earthling©

They endorse United Nations
Global Governance Model 2020©
going LIVE.

They endorse Project Earthling©
going LIVE.

They endorse me & India claiming
93 Trillion – Conservative realistic
estimate for my invention.

Recognize the global fraud of USA.
They support me, my invention and
its adoption globally.

- I have presented the true facts to the media houses, to all Indian citizens, world citizens and all 191 other world countries. The global fraud committed by USA is for everyone to see.
 - All 191 non-USA, non-UK countries will support me & India, as they have seen the global fraud committed by USA.
- I have claimed a conservative-realistic number of 93 Trillion (Earthlings) as my global IP rights sale price to bring into India.
 - All 191 non-USA, non-UK countries will support my claim and India's claim of the 93 Trillion. They understand that myself and India can easily claim 125 Trillion also.
- I am delivering True economic & trade equality; Real economic & trade freedom to all world countries.
 - All 191 non-USA, non-UK countries will support my global Macro-Economic & global Banking reform - Project Earthling© and its go LIVE date of Jan 1st, 2021.
- I am delivering much better, much superior, much more equitable global governance structure.
 - All 191 non-USA, non-UK countries will support my New World Order reform - United Nations Global Governance Model 2020© and its go LIVE by Jan 1st, 2022.

19 January 2020

Reset Global Economics & Enable New World Order

Enabling colorful times

Objective of this media disclosure.
Build awareness of upcoming 18 largest deals in the World. Correct way to resolve the problem.

- Bring media onboard with LINKING all of INDIA to the lawsuit.
- Make media aware of my LIVING WILL for 93 Trillion and its link to lawsuit and India's future.
- Future of India is linked to this lawsuit.
- Introduce the upcoming largest 18 deals (17 TRI-PARTY agreements) in the World to methodically and correctly resolve the global IP rights subject.
- Media to join forces with me and India to bring the 93 Trillion wealth into India.
- Introduce the largest deals to your subscribers & audience.
- Join forces to inform people about the “Execution of the 18 largest deals” in the World.
- Join forces to inform people about how I will build 93 Trillion Earthlings worth National treasury reserve for India.
- Inform people – Indian citizens about the break-down of numbers – deals.
- Inform or introduce ‘National Wealth Bill’ to Indian citizens. Its intent to protect our wealth.

Reset Global Economics & Enable New World Order

Enabling colorful times

Need Media support to take Project Earthling© live. This is for INDIA. To bring 93 Trillion Earthlings into India and build India's own treasury.

Introduce Project Earthling© to your subscribers or viewers as soon as possible.

Enable serious discussions, debate about the reform and its importance to the World.

Get it for a decisive voting at UNGA for implementation by June 1st week 2020.
With a go live date of Jan 1st, 2021.

- For the objectives of:
 - Building India's own national treasury reserve of 93 Trillion Earthlings.
 - To complete the 18 largest deals in the World, off which 17 deals are linked to launch of Project Earthling©, have (Global Earthling Council) GEC as one of the three parties in those agreements.
- I request media houses to make the introduction of Project Earthling© a high priority subject. This is for India and its future.
- This is for all 1.32 Billion Indian citizens.
- Also to deliver economic & trade freedom to all 191 World nations.

What is Project Earthling©?

Introducing new global trade currency.

- Earthling is a new global trade currency & forex currency; while not being a domestic currency of any one country in the World. It will be the accepted national reserve currency. All international bank funds transfers will happen in Earthlings currency. Possible currency symbols are given below.
- Banks convert your local national currency to Earthlings & vice versa. We put an end to multiple global currencies being converted to multiple other global currencies.

Possible Earthling Symbol 1.

Possible Earthling Symbol 2.

What is Project Earthling©?

A long overdue reform. Must happen now.

- It is a reform that is correcting a hidden flaw in the global economic & trade system. USA and UK have used this flaw to dominate the World and rule the World for the past 300 years.
- The World has been cheated for past few centuries by USA and its closest ally UK.
- It is a Global Macro-Economic Reform and a Global Banking Reform.
- This initiative delivers TRUE (business & economic) Independence / Freedom to 192 countries in the World.
- This should have happened 200 to 300 years ago. the correction must happen now.
- The first step towards a balanced world and more equality.
- This initiative brings about more trade and economic equality. It Truly liberates the world.

- This can be termed as “TRUE INDEPENDENCE FOR ALL WORLD COUNTRIES”.
- I request media houses to join forces to shoot for a Jan 1st, 2021 ‘Go live’ date for Project Earthling©. That date will be marked as ‘REAL INDEPENDENCE FOR THE WORLD’.
- Someone told me, with this reform we can end “Anna Domini” and reset years to start from Year 1 FE. Wherein FE stands for Freedom to Earthlings or Freedom by Earthlings. What is your opinion?

The problem of two varying frames of reference.

- All the main global (sought after) commodities in the World, for the past 150 to 240 years, have been skewed in their pricing.
- For the past 150 to 240 years, the global commodities price was not reflecting its real value or sale price; based on its demand & supply.
- For the past 150-240 years, the global commodities sale price has been “Over-priced” by an always artificially strengthened USD (\$), against most global currencies.
- Most World nations have paid more than what they should have for their imports over the last 150 to 240 years; as these commodities bought were priced in USD (\$). Which is also the domestic currency of one country USA.
- Goldman Sachs over the last 150 years has been instrumental in running Wall Street in USA and all major USA Banks; and they were the ones who engineered and abused this system by artificially keeping USD (\$) in fake high demand and strengthening it always against most global currencies. Given the monopoly USD (\$) achieved, there was some demand for it. However, that monopoly has been abused to rip off many countries with unreasonable / unrealistic / inflated Import bills for a sustained period of 150 to 240 years.
- The second moving frame of reference is USD (\$) and its value.
- **These two moving frames of reference caused the World countries to pay more on their import bills for a sustained period of 150 to 240 years.**

How USA cheated the World with unrealistic import bills?

The higher import bills paid by most countries due to second moving frame of reference USD (\$) and its monopoly, for a sustained period of 150 to 240 years.

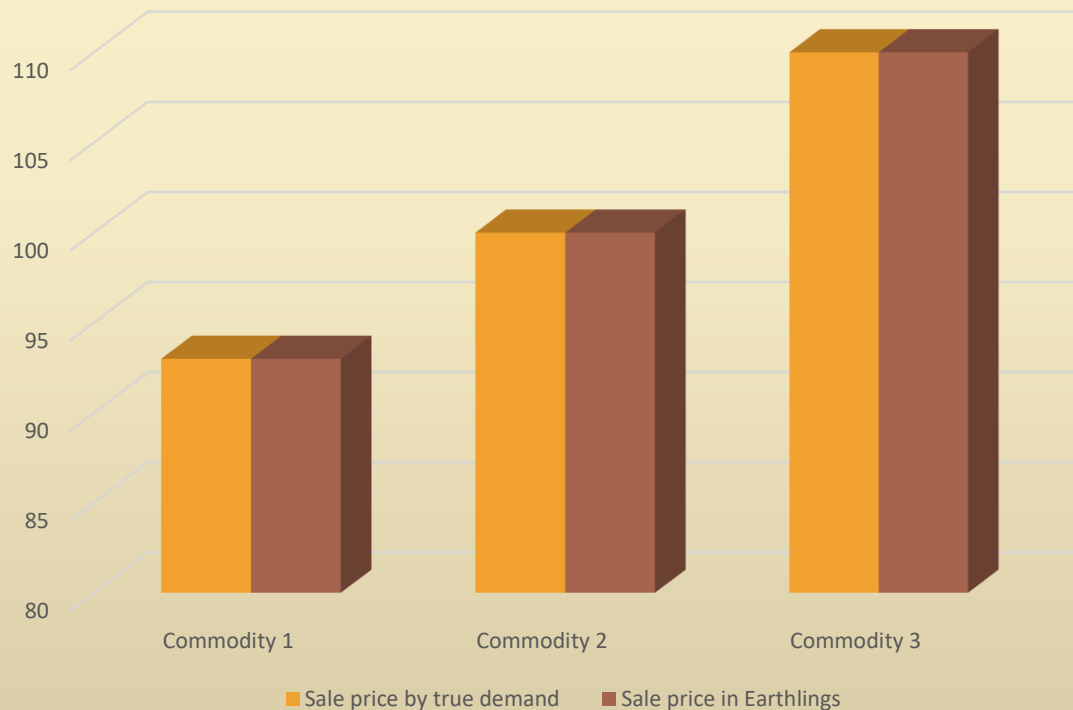

- USD (\$) is the local, domestic currency of one country USA.
- Over the last 150 to 240 years, they achieved global monopoly for USD (\$), by making it a global trade, business deal standard and having most global commodities priced in USD (\$).
- This allowed them to artificially keep USD (\$) strong and thus have had most countries pay more than what they should have paid for their imports. That is how they cheated the World.
- Not for 5 or 10 years. This phenomenon (a flaw costing money to the world countries) has been going on for 150 to 240 years, unnoticed.

Solution to the Problem

Project Earthling© - 'Global Earthling Council'.

Import bills of most countries in Earthlings currency (Non-moving frame of reference). No one will get cheated.

- Make USD (\$) a local, domestic currency of USA only. Not a global standard.
- Introduce Earthlings as the global trade and business currency. While not being the currency of any one single country. All forex transactions must happen between local currencies into Earthlings & vice versa.
- This will reflect the true price of commodities, based on its real demand and supply.
- Earthlings will hold their value for a period of 10 years, and then strengthened or weakened (to support global economy) to hold the new value for another period of 10 years.
- **An independent body called 'Global Earthling Council' must be formed to keep strong financial control on Earthlings printing and global financial transactions.** It must have all country representation for governance. GEC will be responsible for anything and everything to do with Earthlings.

Features & Advantages of Project Earthling©.

- All global trade commodities will be priced in Earthlings.
- All exporters will price their offerings (products or services) in Earthlings; making it a single global market-place.
- At international airports, point of departure, the forex stations should allow buying Earthlings against local currency. At the point of destination, forex counters should be able to convert Earthlings to the local currency of that country. So, most international travelers could only carry Earthlings and travel to any country and shall do fine upon landing.
- All global fund transfers (international wire transactions) will happen in Earthlings, thus simplifying global trade / transactions. E.g., Whether you are transferring funds to Europe, China, Japan or Korea, you always do the international wire transfers in Earthlings, despite their local currency. The recipient Bank upon funds receipt in Earthlings, could either hold them in Earthlings or convert it to their local currency, as per its preference.
- Global banking is simplified. Many to many currency conversion headaches are removed for Banks.
- Most importantly, this brings economic and trade equality to planet earth. World will become a single market-place for most exporters.
- It gives equal opportunity to all countries and brings balance to global trade.
- Countries with no currency today, should come up with their own currency which is at a certain proportion against Earthling, to enable them to do trade or generate wealth from what they could export.
- All developing and least developed countries benefit significantly from this.
- USA and its economy will also be subjected to checks and balances.
- BRICS can take advantage of this new system and can be much more competitive on the global stage, as undue advantage of USA that has gone on for centuries is eliminated.

Features & Advantages of Project Earthling©.

- All international airlines could price their flights in Earthlings and the local price could easily be computed by the customers at the exchange rate to Earthling (at the time). It makes their pricing and offering easy and simple to all, instead of pricing at individual country currencies.
- All global 'Money based rankings' could be done in Earthlings. For example, Forbes richest people listing cut-off could be by Billion Earthlings or more, GDP (nominal) of countries will be listed in Earthlings (GDP-PPP (by Purchasing Power Parity) will cease to exist as a national economic indicator), Global movies earnings and rankings could be in Earthlings, International hotel stay pricing could be in Earthlings, International tourism packages pricing could be in Earthlings, Global commodity pricing could be in Earthlings, International products or services pricing by exporters could be in Earthlings, International sports tournament prize money could be in Earthlings.
- Each country could have a special 'International trade Bank' which allows bulk Earthling transactions to other entities in other countries, for registered global traders who do import / export of goods. As another thought, all international trade must be done online and should be transparent to the government, CB and the special International trade Bank in the country.
- All banks should allow international wire transactions in Earthlings, in smaller amounts with a cap, for regular citizens.
- Local or domestic business; whether online or offline, must be conducted in the local national currency only.
- This will regulate international trade and forex transactions. E.g., USA can still print Dollars for domestic needs; UK can still print Pounds for their domestic needs; however, they cannot use them (their local currency) for international trade directly. And they (USD and Pounds) will be useless in any other country.
- The initial exchange of each country's holdings into 'Earthlings' will be on record. Along with such data, the international trade numbers (done in Earthlings) of each country will also be on record and available to all nations. This curbs all fraudulent activities funded by bribes using any one local currency in a different country.

Roll-out (Go LIVE) steps for Project Earthling©.

The procedural steps involved in launching 'Project Earthling©' will be as follows.

Step 1 – The initiative must be **introduced at several global forums**, such as United Nations (Economic & Social Council, General Assembly), G20 Summit, WTO, WIPO and to all country governments and their Central Banks (CB's).

Step 2 – Discussions and voting. The introduction would lead to discussions at many levels. Post discussions, a UN voting must be conducted, with one vote per country on the subject. This initiative will be voted in. A governing body must be established and made operational. (Name (e.g., Global Earthling Council), governing team (e.g., One member from each country) and other details (e.g., role, responsibility, scope of work, charter, etc.)) must be outlined.

Step 3 – Once the initiative is voted in, we need to **design the currency bills.** (a) Billion, Half Billion, Million and Half Million Earthling bills for CB holdings and exchanges. (b) 10000, 5000, 1000, 500, 100 Earthling bills for citizen (international travelers) exchanges only. There shall be no other denomination (for e.g., currency bills of 50, 10, 5, 2 or 1 used for local purchase transactions). As no country allows purchase/sale (or local / domestic retail businesses) by using Earthlings. It is only an International trade currency and foreign exchange currency and not for domestic trade or business.

Step 4 – 3 Mints that will print Earthlings shall be set-up in a single location. These mints will be governed by GEC which will have all country representation; and will be under 24*7 surveillance. The location should ideally be in India. City to be selected.

Step 5 – Flushing USD's from all non-USA countries. Earthlings shall be printed to replace USD holdings of all countries (their CB's). The exchanged USD's should be retrieved and trashed / shredded (as in truly replaced).

Step 6 – Monitoring and Controlling the Earthling printing. Begin of normal – regular GEC operations. After replacing the reserves of each country (their CB's) by Earthlings, GEC would be highly restrictive in selling Earthlings to countries. Based on the analysis of trade requirements of nations (categories of nations), adjustments could be made to GEC policies over a period of time.

Freedom to United Nations by Project Earthling©.

- United Nations and its organs can finally get freedom. Their expenses & salaries will not be paid in USD anymore. They don't have to report to USA and / or UK.
- Global Earthling Council (GEC), will pay for all United Nations expenses (and salaries); in an annual reimbursement model against the local domestic national currency expenses.
- This will allow the evolution of current day United Nations into 'United Nations Global Governance Model 2020©' which is the next section we will discuss & talk about.

Each Country Earthlings reserve equation

Current Earthling reserve = Last year 'Earthling reserve' – Total FY Earthling reserves spent on national development work – Total FY imports + Total FY exports plus or minus Citizen activity.

Wherein;

Citizen activity is international travelers (incoming and outgoing) exchange of Earthlings to local currency and vice versa at forex counters; and plus or minus Non-business citizen remittances in Earthlings (incoming and outgoing) through Banks.

The data of FY imports and exports will be available with the 'International trade bank'. **Updates made on 18/1/2020** – Removed the references to add/subtract Earthling purchase & sale with GEC. It is early to disclose the specific rules, restrictions and policies of GEC at the time of launch and further they may be subjected to amendments over a period of time. The formula will adjust accordingly. GEC may give development loans (packages) by recording it as a loan & liability against the Country's financial records. Some countries may take the loans (once they see & understand my Earthling Foundations work and upcoming initiatives in India) and want to emulate the work in their country.

GEC Opening National Treasury balances of 193 countries when PE© goes live.

- Before Project Earthling© goes live on Jan 1st, 2021, GEC records the 'Opening national treasury balances' of all 193 countries in the World. At the end of each financial year; GEC also records the 'Closing national treasury balances' of all 193 countries in the World.
- The guiding principle for 'National opening treasury balances' is: **The Central bank starting balances when Earthling goes live must be a true, real reflection of the existing world and each country's economies and their real earnings. Real reflection of true earnings is the key phrase. It could also be read as real reflection of true contribution to the World by way of their inventions & discoveries delivered over the last 300 to 500 years.**
- GEC will continue to track these for decades and centuries to come. Here is a look at what some of the country's opening national treasury balances will be.

- #1 – India @ 93 Trillion Earthlings; based on recognized value by virtue of 18 IP rights sale agreements.
- #2 to #15 – These 14 slots must be taken by countries that have contributed the most to the World, by way of their inventions & discoveries in the past 500 years. The countries that may appear in this list are (not limited to) Germany, Russia, France, Spain, Portugal, China, Japan, South Korea, USA & UK. Maybe Iran & Turkey may have some inventions from past, which they must present and make a claim.

USA's GEC national treasury opening balance, is a subject of discussion.

- #1 – India @ 93 Trillion Earthlings; based on recognized value by virtue of 18 IP rights sale agreements.
- Because of USA 's unlimited printing of USD (\$) over the last 240 years; there is no starting point reference for them. They could claim 3 Trillion, 5 Trillion, 10 Trillion, 15 Trillion or even 40 Trillion. Their opening balance is a subject of discussion for all the countries in the World. Here are my remarks about USA's opening national treasury balance.
 - I think based on inventions & discoveries of last 500 years, a select list of 14 inventive countries must share a 'contribution to world wealth pool of 15 Trillion' among themselves to take positions from 2 to 15; in the opening balance rankings. USA must be one of these 14 countries.
 - All the other countries must go on their actual numbers. Many countries may have zero opening balance. Many countries may have small amounts as opening balance. There is no lower limit. It is a starting point and will allow the country to introspect & reflect on their situation and move forward.
 - The number USA claims is very crucial; because it may incite the other 178 countries in the World, to look at their extra import costs (due to artificially strengthened USD(\$)) over the last 150 to 240 years.
 - They may ask for reimbursement or payback from USA for the 'Import bill' losses they have incurred over the last 150 to 240 years.
 - USA must settle for a reasonable number as agreed to by world nations; without getting themselves into 'Import bill losses reimbursement from last 150 to 240 years period'.
 - My expectation (a guess) is that USA opening balance claim of 3 Trillion maybe accepted by World countries.

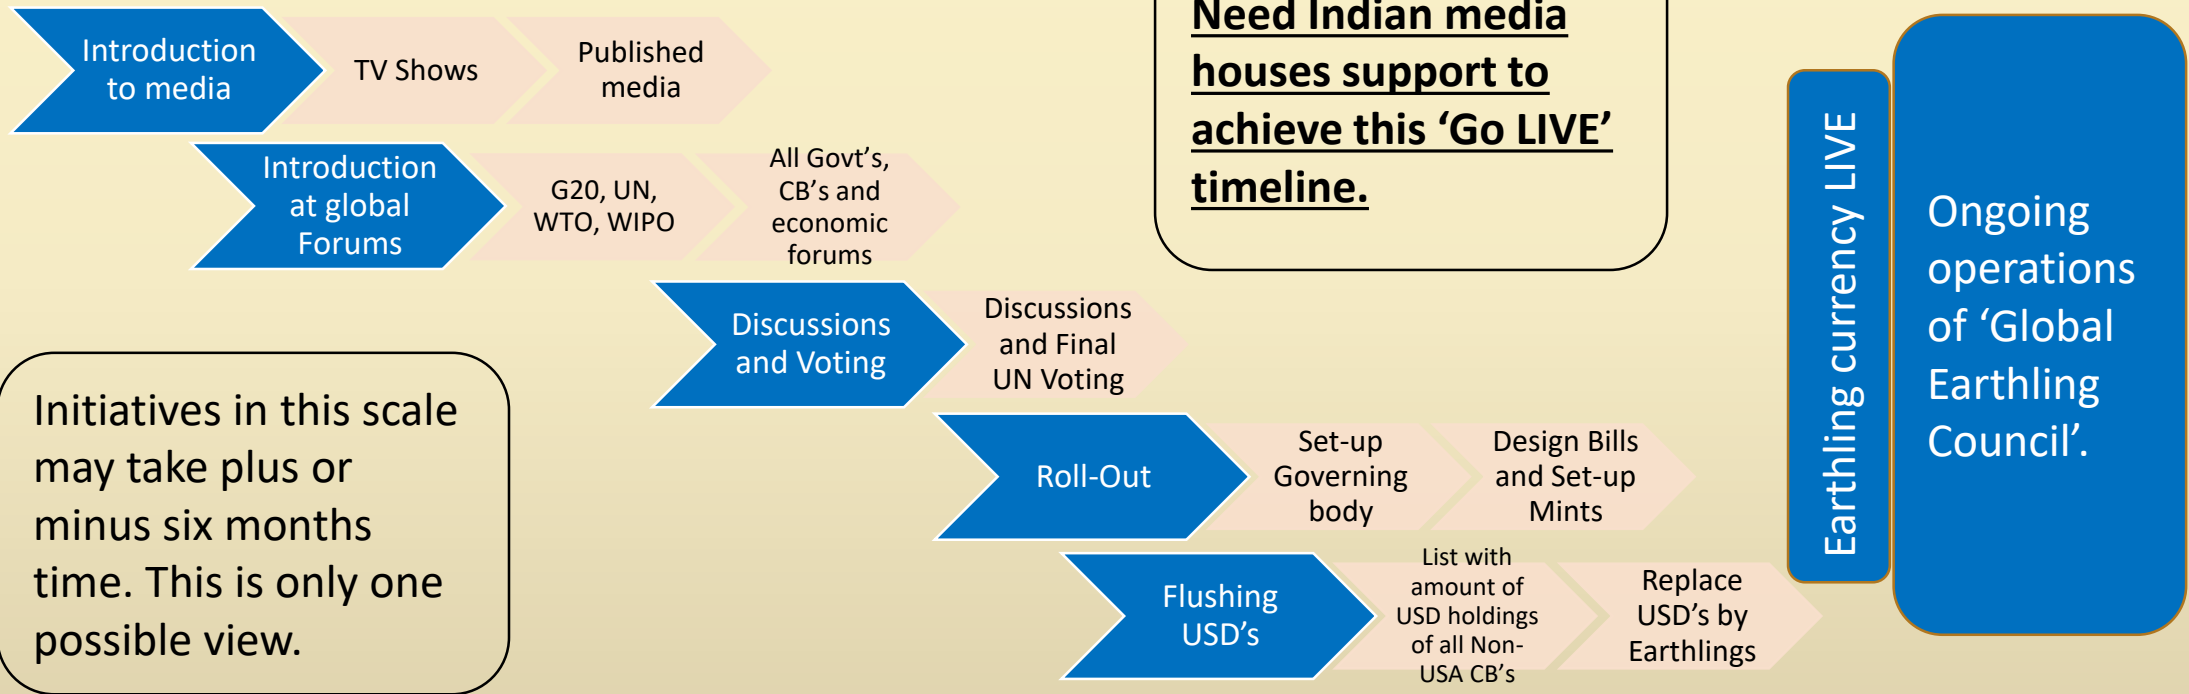

GEC Opening National Treasury balances (OB) of 193 countries – Options due to uncertain USA OB.

- The easiest option for the 193 World nations would have been to just record the actual (current day) opening balances of all 193 countries. However, due to the unlimited printing of USD (\$) for over 240 years by USA, the following options maybe considered by 193 World countries.
- Option A – India @ 93 Trillion, USA at 2nd position with an accepted OB number of 2 Trillion or a maximum of 3 Trillion; while all other world countries go on their actuals.
- Option B – India @ 93 Trillion, and a contribution to World by inventions pool of 5 Trillion consensually distributed between 14 inventive countries thus taking rank positions from 2 to 15. Inventions in the last 300 to 500 years maybe relevant to today's world. Not the ones before.
- Option C – Option B with a distribution pool of 10 Trillion between the 14 inventive countries.
- Option D - Option B with a distribution pool of 15 Trillion between the 14 inventive countries. This distribution pool seems to be on higher side, however, if World countries agree, it could be chosen.
- Option E – India @ 93 Trillion, USA @ 1 Trillion; and all other World countries on actuals. Easiest and simplest option if 193 countries were to come to consensus with it.
- Which ever option the World votes for, USA must beware of not getting into “Reimbursement of import bill fraud” by the World countries. Even a low percentage claim of 5% (could go up to 20 or even 25% reimbursement claim) will be a huge liability for USA, to the rest of the World countries.

Roll-out Timeline projection

Possible roll-out plan

Possible Earthling Symbol 1.

Initiatives in this scale may take plus or minus six months time. This is only one possible view.

Need Indian media houses support to achieve this 'Go LIVE' timeline.

Reset Global Economics & Enable New World Order

Enabling colorful times

Earthling valuation cycle.

- Jan 1st, 2021 – Project Earthling shall go live at the same value as USD.
- Earthling shall hold its value until Dec 2030.
- Q4 2030, Global Earthling Council shall conduct ‘Economists summit’ to set the value of Earthling for next 10 years. It is either strengthened or weakened based on needs of developing and poor countries.
- Earthling takes new value by Jan 1st, 2031. And shall hold the new value until Dec 2040.
- Q4 2040, its value is adjusted again.
- Earthling’s new value takes effect by Jan 1st, 2041. And shall hold the new value until Dec 2050. This cycle continues.

Reset Global Economics & Enable New World Order

Enabling colorful times

Objective of this media disclosure. To build awareness of Project Earthling© and take it LIVE.

- Publish about Project Earthling© as global reform content in all published media.
- Broadcast about Project Earthling© on prime-time media network, as global Macro-Economic & global Banking reform.
- That will bring global countries to talk and discuss about Project Earthling©. At various levels - Local, regional, global, government forums, economic forums, business forums, WTO, WIPO, Trade forums and student forums.
- This will bring me to introduce Project Earthling© at UNGA and Economic & Social Council.
- **Together, lets work towards this timeline:**
 - Jan to May 2020 – Enable global discussions and conversations about Project Earthling© and its impact to the World nations. At various levels - Local, regional, global, government forums, economic forums, business forums and student forums.
 - June 1st week – Decisive voting of Project Earthling© at UNGA.
 - Japan time 00:00 hours of Jan 1st, 2021; Project Earthling© goes live.

United Nations Global Governance Model 2020©

Enable New World Order
Deliver the Right Governance to World

Enable New World Order
Author – Srinivas Devathi

19 January 2020

Reset Global Economics & Enable New World Order

Enabling colorful times

Existing Order – Old World Order

Problem definition.

- USA & UK over the last 600 years have controlled, commanded, ordered, used & abused all countries, all global organizations, all global pacts or treaties; with singular motive (objective) of staying as **“Controlling super-power”** of the entire World.
- The hidden motives include staying the richest in the World. Staying most powerful in the World and control everything in the World.
- In efforts to retain these pole position(s) by wealth & power; they have destroyed, derailed, rest of the world nations and in deliberate effort have blocked the progress, development, wealth prospects & success prospects of all World countries and World citizens (who are not American and British).
- This is the core problem, defining the Earth we live in; which is troubled with war, death and a multitude of problems.
- USA and UK which have lead the World (all its countries) and people over the last 300 years (USA) and the block of 300 years before that (USA and UK together); have only put their interest, their wealth, their supremacy, their domination on the World as priorities all this while; and completely ignored the needs of the individual countries and people.
- While doing so, they have controlled every country in the World with an engineered lever of control.
- Simply put USA and UK over the last 600 years of governing the World, have made the World a bunch of slave nations which are captive to them and must abide and follow their orders. This is a slave planet by design and engineering of USA and UK.
- **Thus, over the last 300 to 600 years, the World (now 191 Non-USA, Non-UK countries) and its population (now an estimated 9.5 Billion people) have been governed the wrong way.**

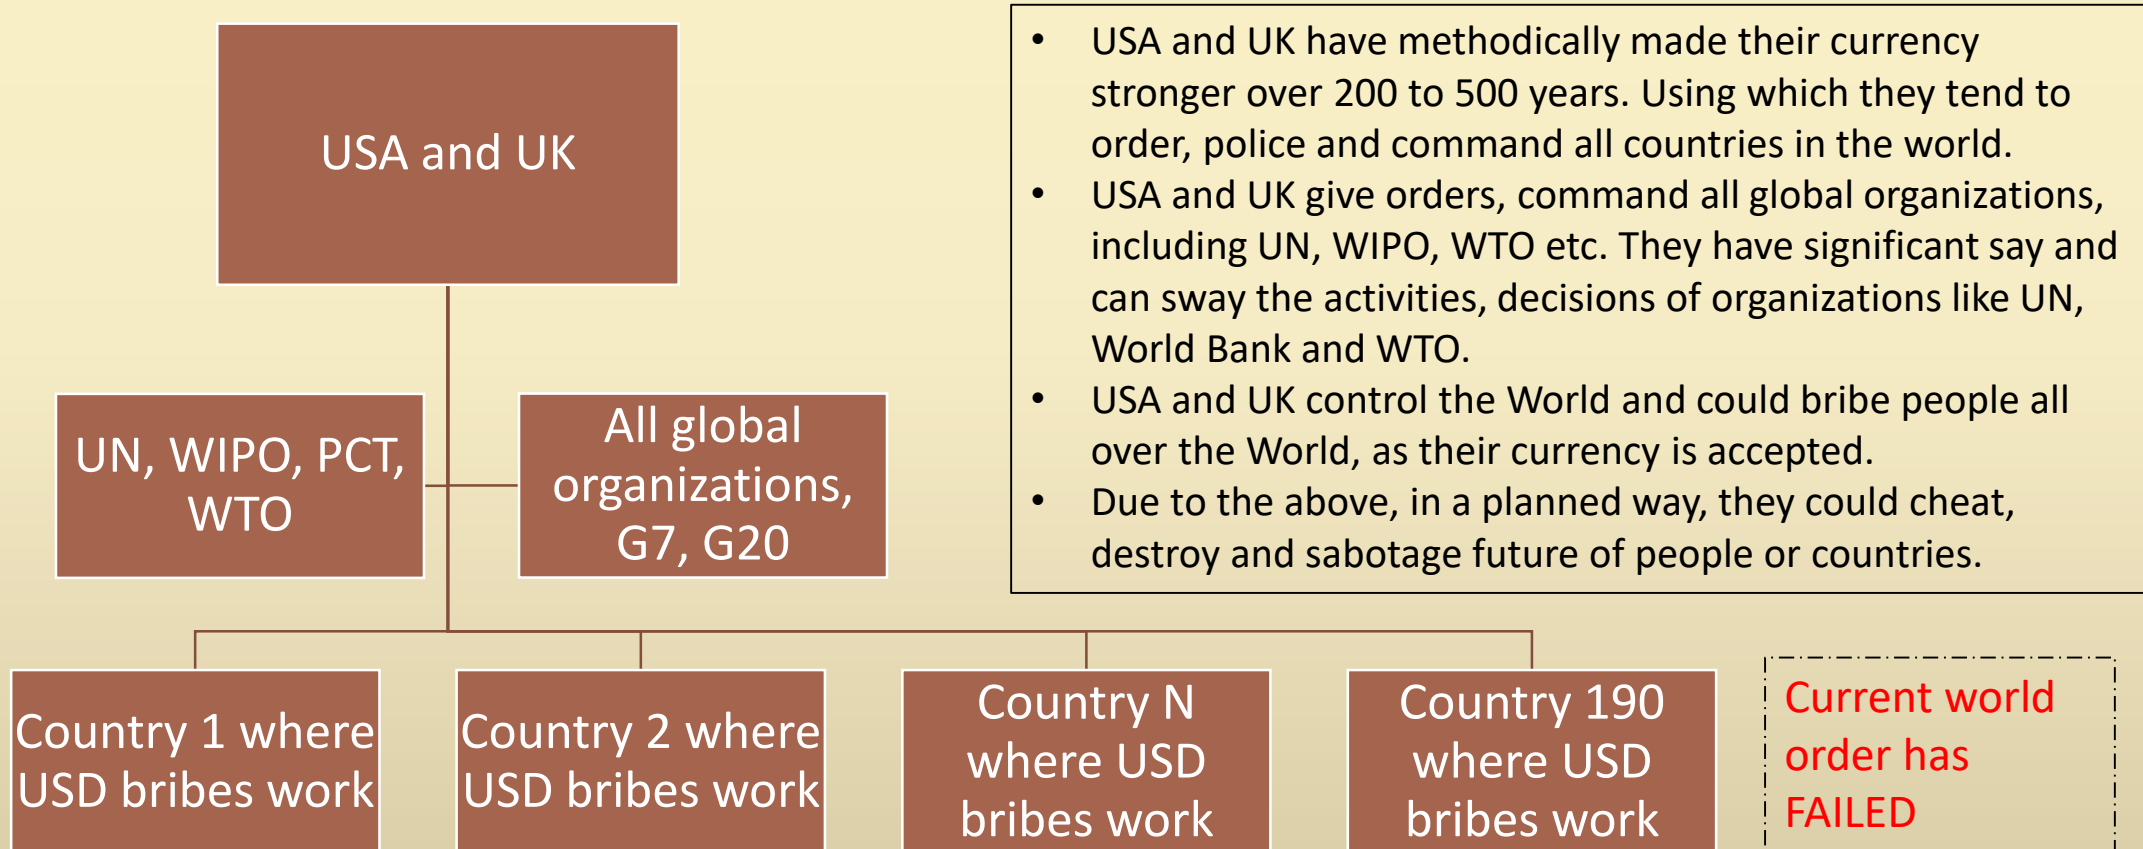

Existing Order – Old World Order

Problem definition & first step to solution.

- History clearly suggests that USA (UK in some cases, situations) has used their currency USD (\$) (as Project Earthling is yet to roll-out, by this year-end) to pay for all global organizations and executing, maintaining and enforcing most global Treaties. While, paying for them, they have controlled, manipulated and engineered all these global organizations and treaties to their benefit and advantage alone, at the expense of the benefits to the World. The true essence of these global organizations and treaties has been lost, diluted and rendered ineffective; by USD based capitalism model driven greed, generated across the world, which was used as a manipulating factor.
- Example of global organization: World Bank, unable to fund my project/invention though my invention was global in nature. Example of Treaty: PCT – Patent Cooperation Treaty. They (USA and UK) have shown no respect to PCT, the Treaty.
- **First step to solution - Project Earthling© will help the situation and we will move towards the correct governance solution:**
 - When Project Earthling© goes live, USD (\$) will become USA only local (domestic) currency. Pounds will become UK only local (domestic) currency.
 - This will stop the “Throw a suitcase of currency” to anyone, anywhere in the World in USD (\$) or Pounds as bribes and get anything done. Mostly unlawful activities will be stopped.
 - With the financial muscle taken out of the equation; USA and UK cannot govern or control the World and the World organizations. Rightfully so. We have come to the right ‘Frame of mind and thinking’ now in year 2020.
 - **When this financial muscle is taken out of the equation, USA will become just another country, one of the 193 countries in the World. UK will also become just another country, one of the 193 countries in the World.**
 - **This means USA = UK = Tonga = India = China = Any other country in the World.**
 - **Project Earthling© will drive economic equality among all countries.**

Existing Order – Old World Order

Problem definition.

New World Order Inevitable Invention to PE© and then to UNGGM-2020©.

Vehicle Color Change technology was invented by Srinivas Devathi in Q1-2007 (when he bought his third used silver car), and a USPTO patent application was filed in March 27, 2014; PCT global application was filed on July 15, 2014.

This invention has created wealth globally in the order of 93 Trillion \$ / Earthlings as sale price in 2019 \$, when GDPs of many countries in the World are in the range of 0.5 to 10 Trillion \$s. In order to retain their supremacy USA and UK have used, abused the Old-World Order to the hilt to block this wealth from me and India. They have abused the entire World and broke every law locally and internationally.

This has caused the World to go into introspection. In order to accommodate the invention in a structured manner (while retaining a good portion of the evolved current global organizations like WIPO, WTO, UN etc.), Srinivas Devathi has authored 'Project Earthling©' and 'UN Global Governance Model 2020'.

While accommodating the Invention, Project Earthling© will roll out a new, better, equal, uniform world; by improving the existing structure in place and rolling out a NEW WORLD ORDER of 'United Nations Global Governance Model 2020'. This will enable the right governance of the World (all its nations) and its people. Other countries and their citizens can aspire to create wealth for themselves and their country.

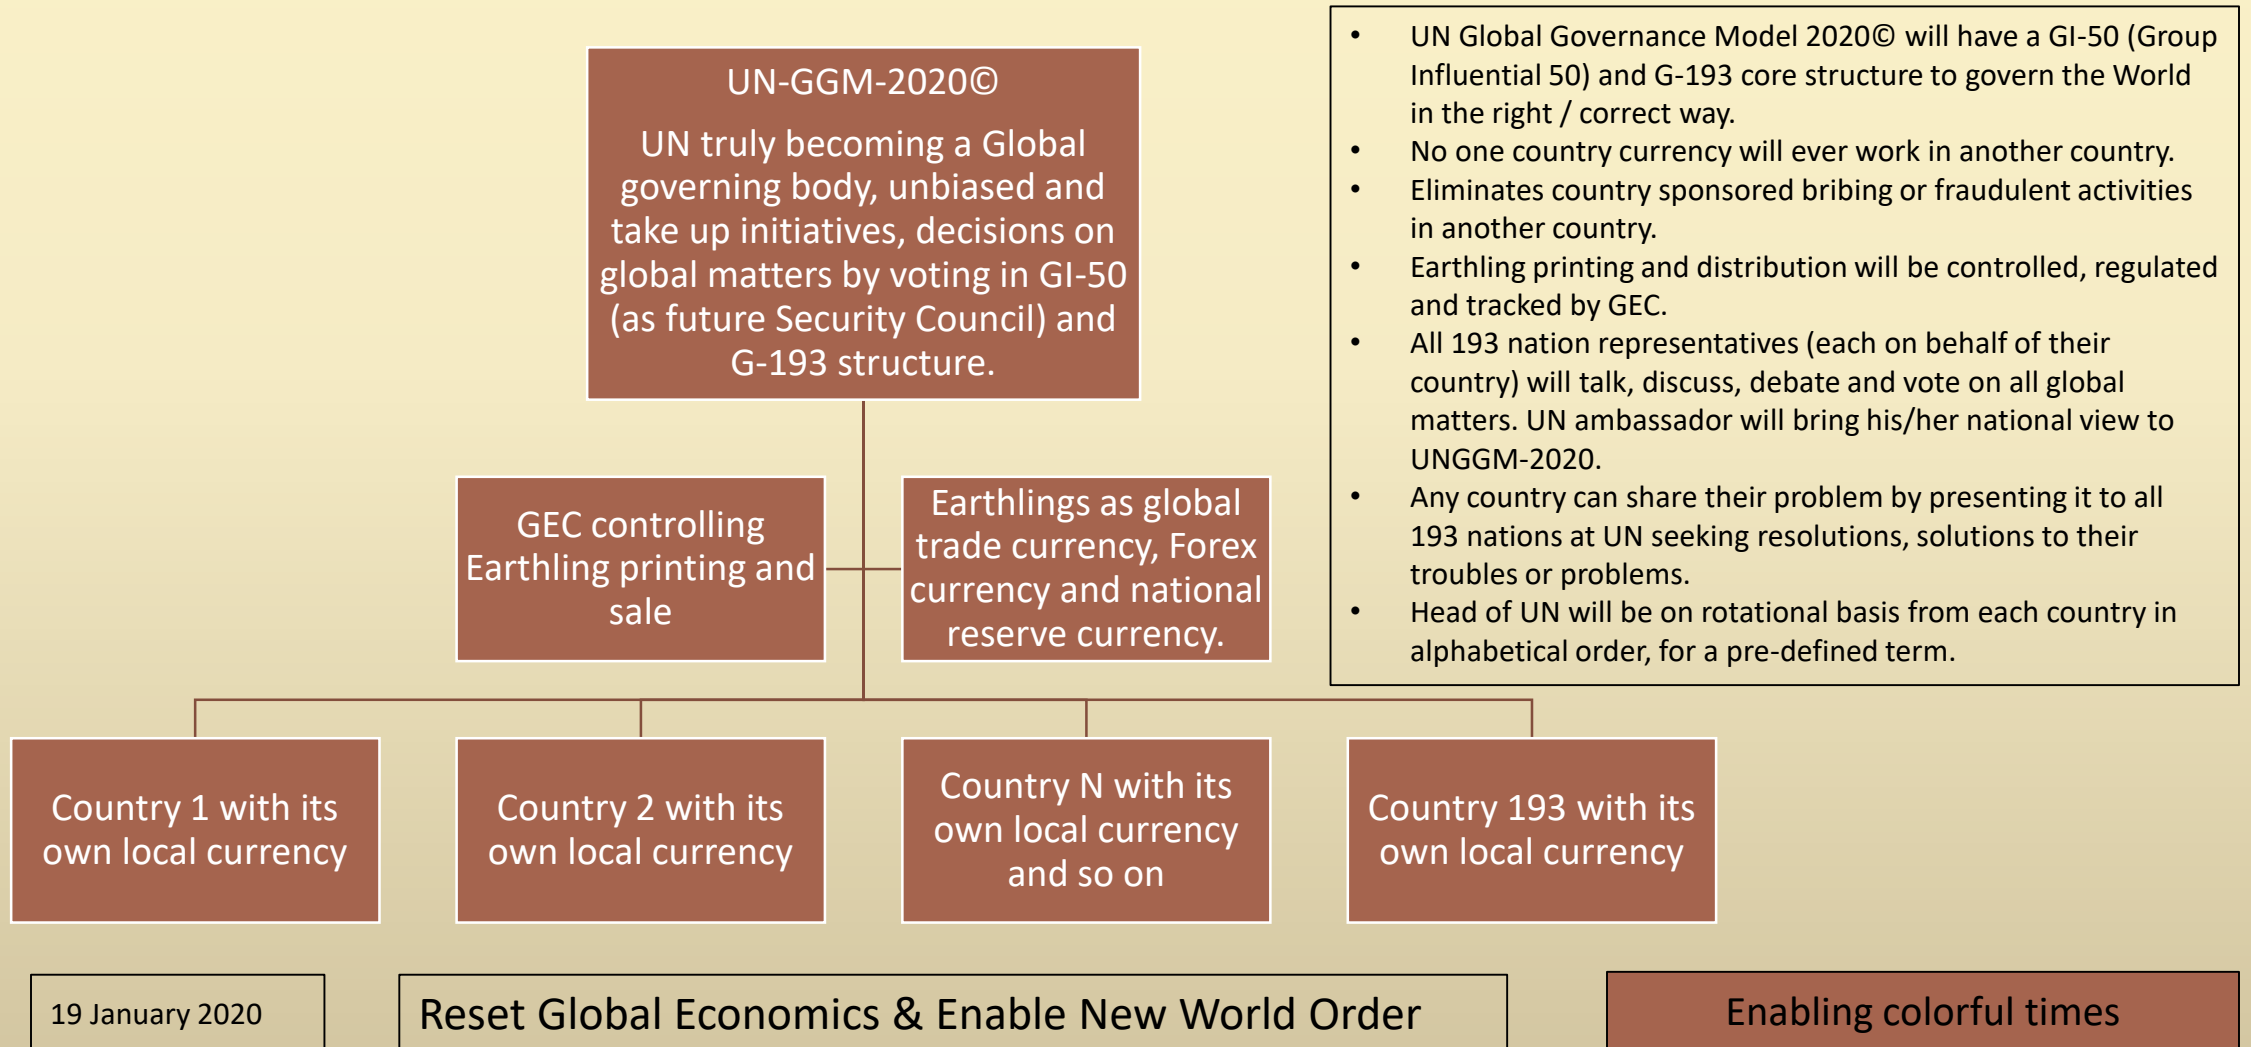

19 January 2020

Reset Global Economics & Enable New World Order

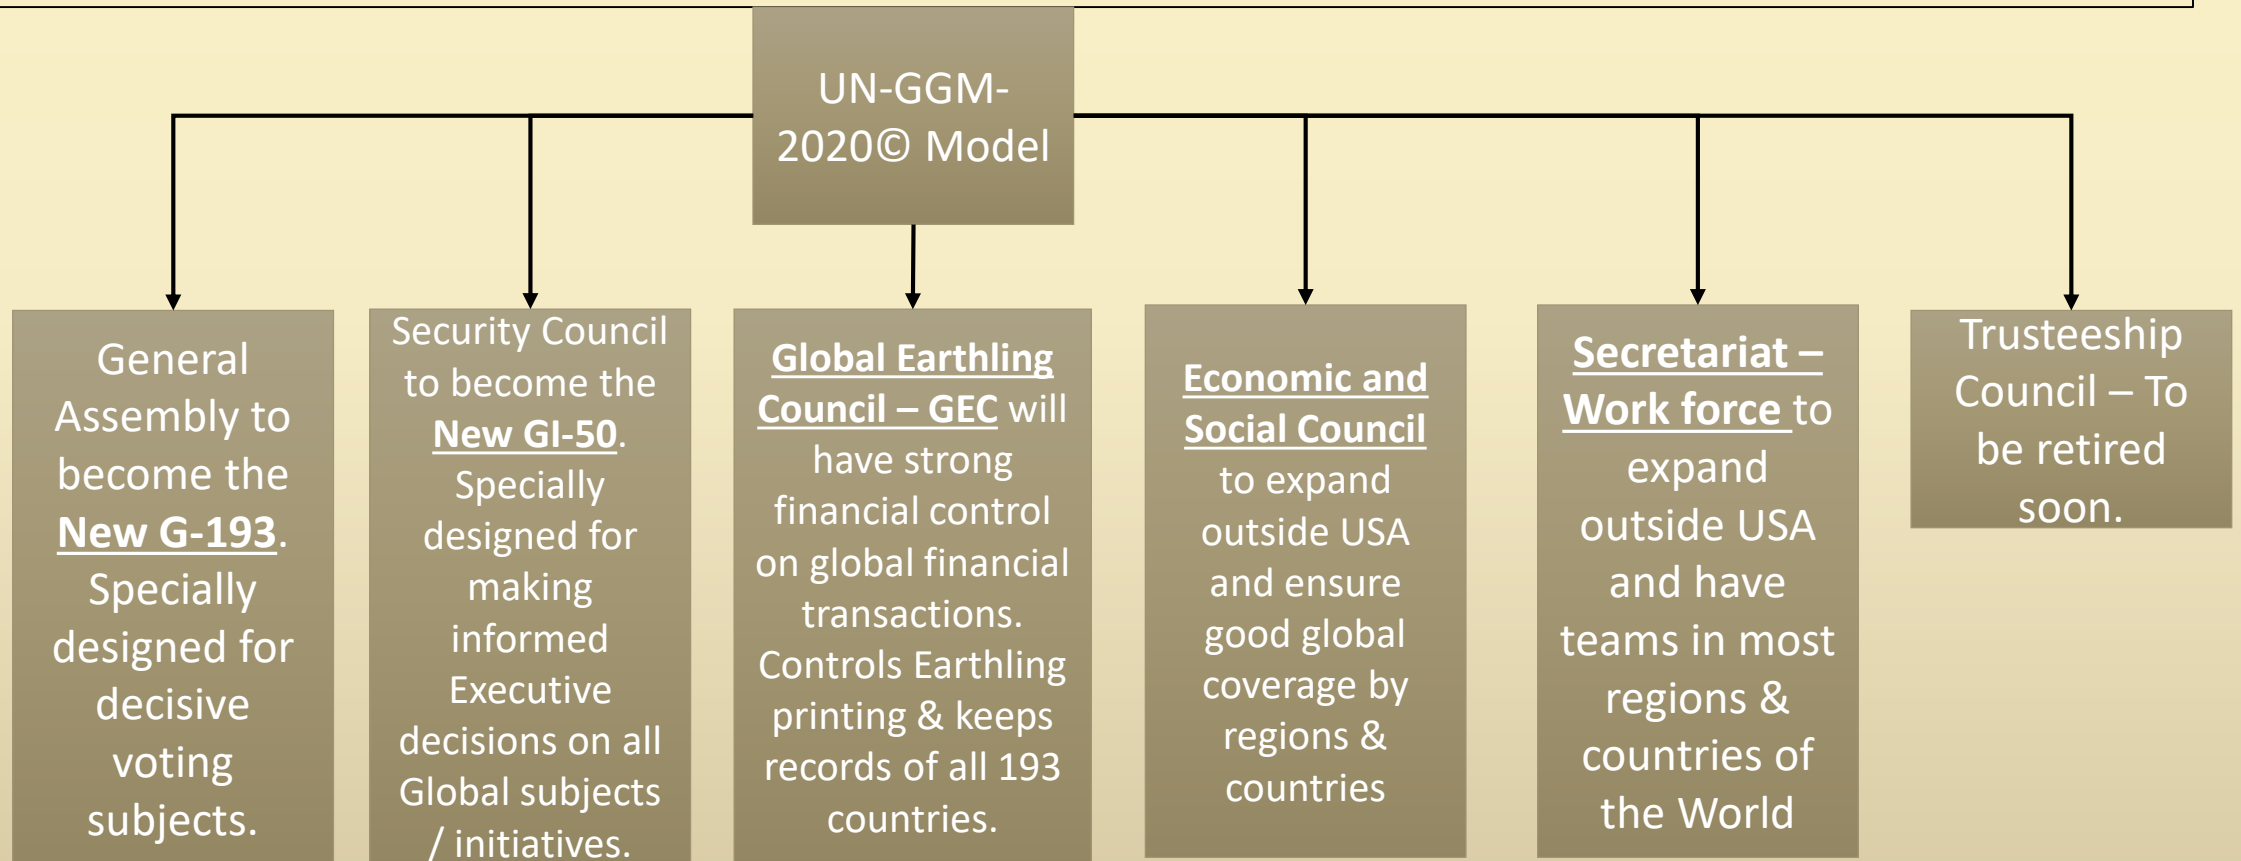

Enabling colorful times

New World Order Inevitable

New Order – UN-GGM-2020©.

Composition of UN Global Governance Model 2020©.

Composition of UN Global Governance Model 2020© - Two main decisioning divisions.

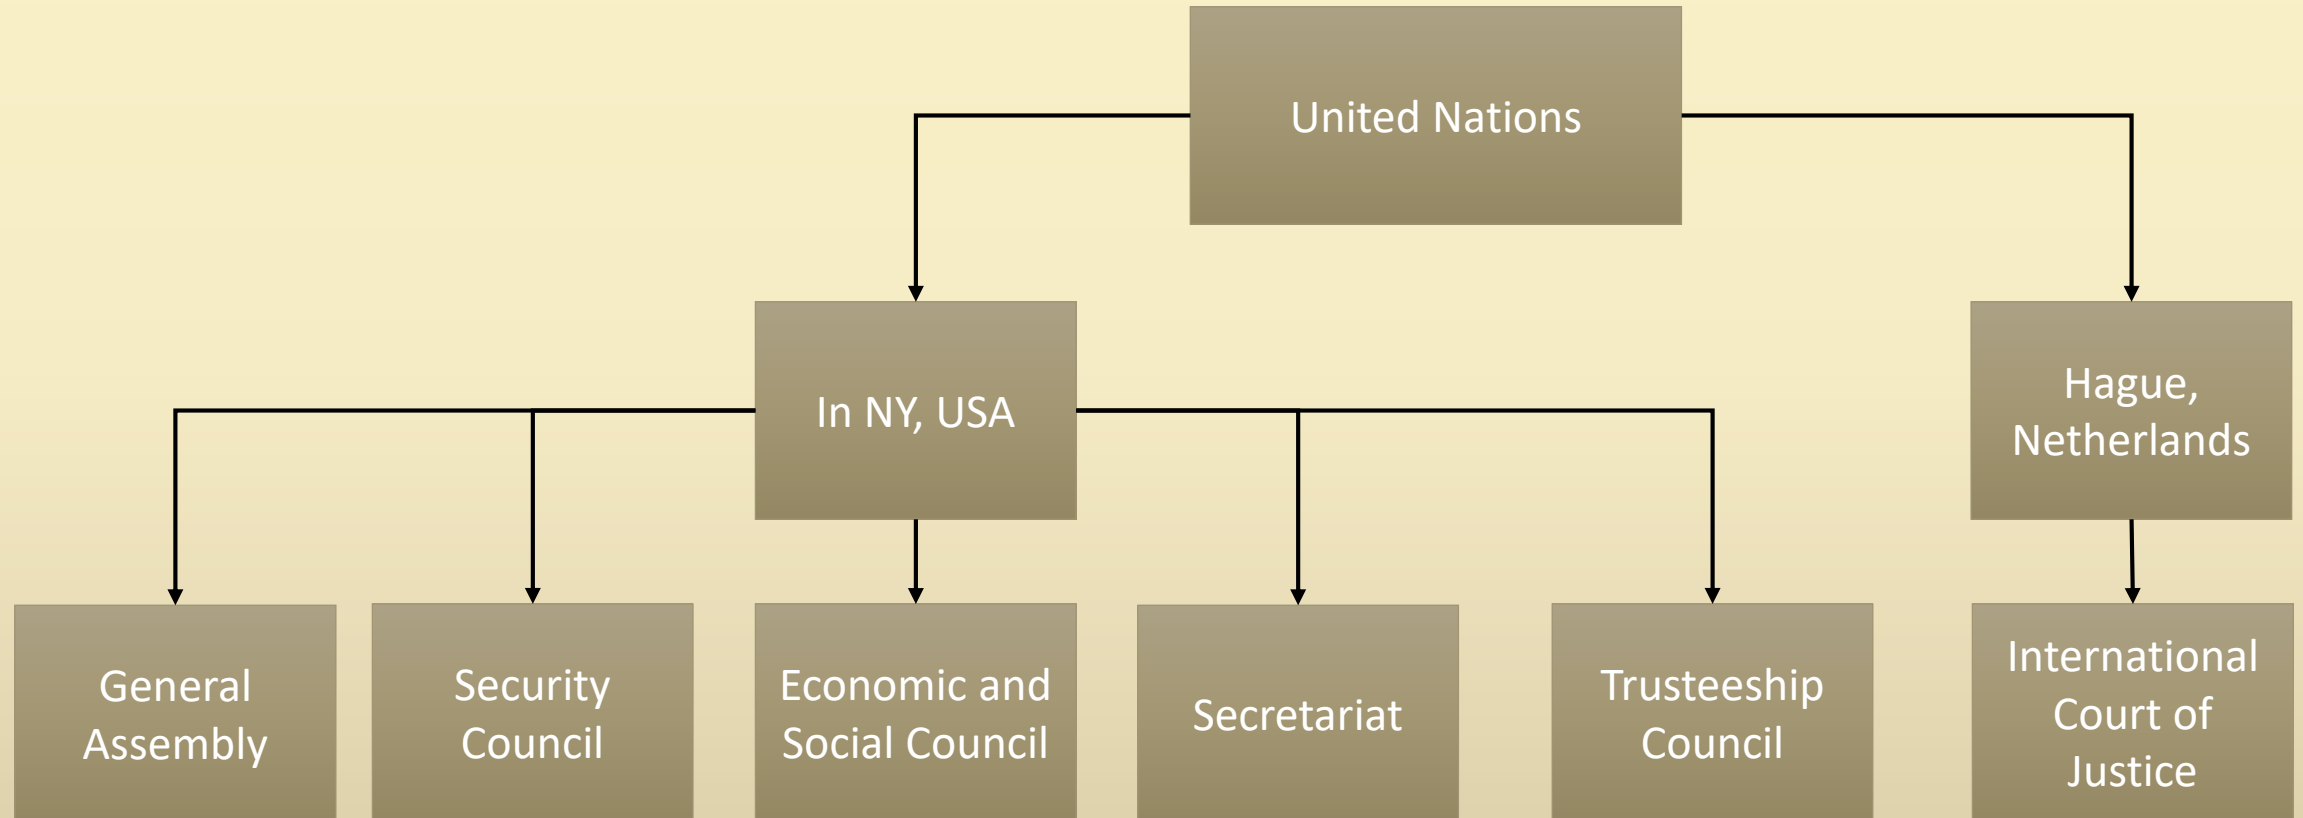

Group Influential 50 (GI-50)

- It stands for Group Influential 50; a group of 50 countries which by virtue of their population, GDP, Technological advancement, Economic growth potential, Natural resources or a possible Geo-strategic factor (ensuring good spread and complete coverage of all regions in the World); enter the GI-50 group all of who together will govern, administer and run the World comprising of 193 (equal) UN member nations.
- This replaces G-7 and conventional G-20. And would certainly stop USA and UK from running the World. Another way of looking at this is a permanent expansion of UN security council from its current 5 permanent and 10 non-permanent rotational model into a permanent 50-member security council.

Group 193 (G-193)

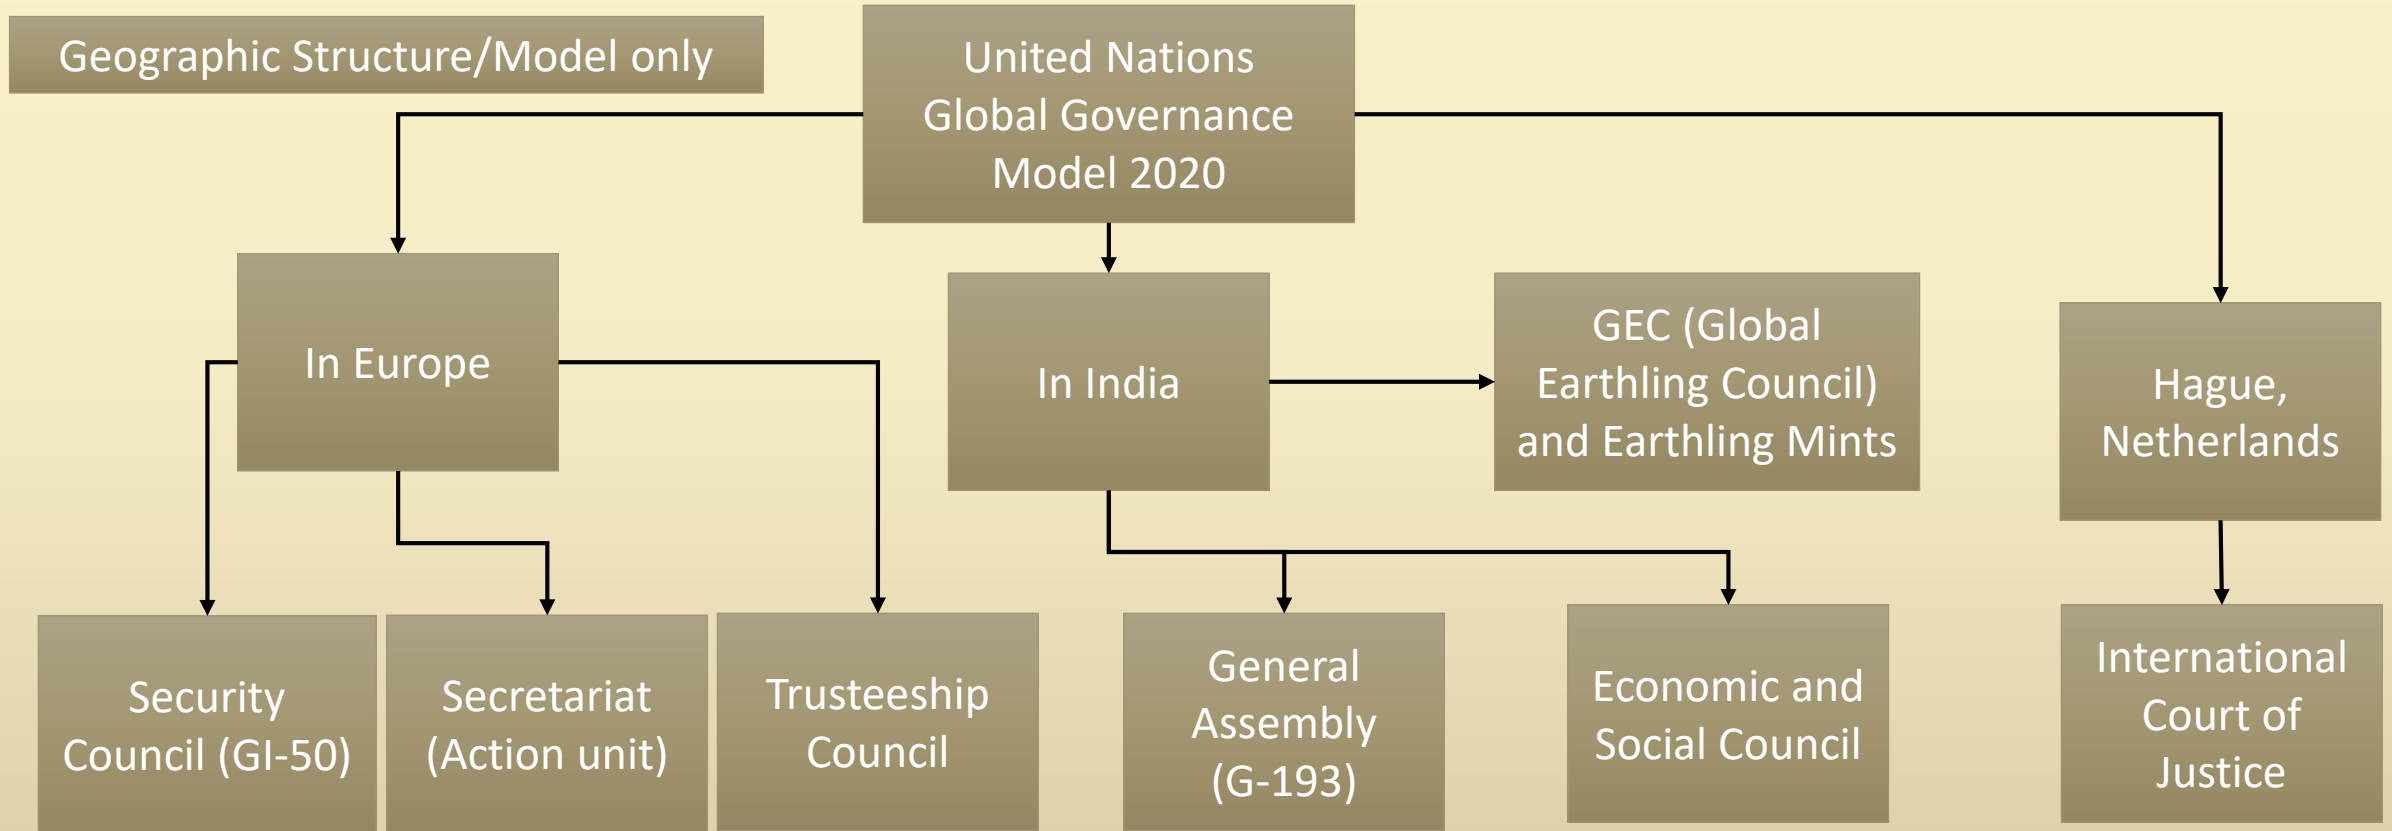

- It is a method by which every important / significant decision pertaining to the World / Planet / Region in the World that needs decisive voting will be put up for a decisive vote at UNGA after introducing the subject, allowing discussions, debates and finally conducting a decisive voting on the subject. Such a model is a true 'Democratic way' of making real informed decisions on all important globally relevant subjects.
- The current UNGA and its operational model could be tweaked to evolve it into a formal G-193 wing. This transition will certainly have its impact on the UN Secretariat and the team structures within the Secretariat.

Current UN structure (Geographic).

Future UN Global Governing Model 2020

High level view ONLY (Details not covered).

Comments: Cities in Europe and India are to be determined. Trusteeship Council will be decommissioned in a decade or two.

Benefits of New World Order Many to be Ignored.

- UN Global Governance Model 2020, will govern the World in the right / correct way.
- In the UN GGM 2020, GI-50 (Group Influential 50) will be an expanded Security Council which can take and pass executive orders. They will be fair as 50 countries represent the World nations and regions in the correct way.
- In the UN GGM 2020, G-193 (Group 193) will vote on all subjects global in a decisive voting process / mechanism.
- Project Earthling© will allow USA and Inventor Srinivas Devathi to resolve the 'Vehicle color Change Technology' subject in a systematic way and disburse the IP rights globally in a structured manner.
- Project Earthling© further allows conversion of USD to Earthlings so as to build our own Indian National treasury.
- India (or any Country) need not be a slave nation to USA or any other, by depending on their currency.
- Project Earthling© decentralizes all 193 countries in the World and make them independent.
- Each country in the World could build their own treasury of wealth in Earthlings.
- United Nations will become a much stronger Global governing body and will deliver fair governance.
- GEC (Global Earthling Counsel) is formed and it monitors wealth of the World.
- World is no more controlled by one or two countries. All countries will become free and truly liberated on the planet.
- All these global organizations will operate by voting (one vote per nation) on global subjects. Will have all 193 member nations indirectly on governing (or decisioning) board through GI-50 structure.
- The World together will govern Global governing bodies. It is a much safer world and no one gets cheated.
- Chaos in the World is eliminated. Proper structure brought into the World. There will be no more confusion, fraud or cheating.

Roll-out of New World order in Two phases.

Phase 1 – Complete Leadership teams' transition must happen before Dec 31, 2020. All the new divisions will be formed outside USA and the leadership teams are completely established. The national team pay-roll set-up, employment procedures, operational procedures, secure systems to work with, data warehouses to hold global data are all set-up in this Phase 1. One point to note is that the United Nations Global Governing Model 2020©, will hold the most important data of the World, and from across the World; and further will roll-out and manage the most important projects in many countries and hence the data security and data management will be a very critical point for the 'Transition Leadership Team'. Especially, the GEC systems, baseline national economic data will be very sensitive data and must be maintained with high levels of security, so that no breach shall occur.

Phase 2 – Complete Transition must complete by Dec 31, 2021. With new offices set-up and expanded team hiring across the divisions. This phase will also include the complete / full team transitions and new regional and national team structures set-up; with all required technology, systems and data warehouses taken live.

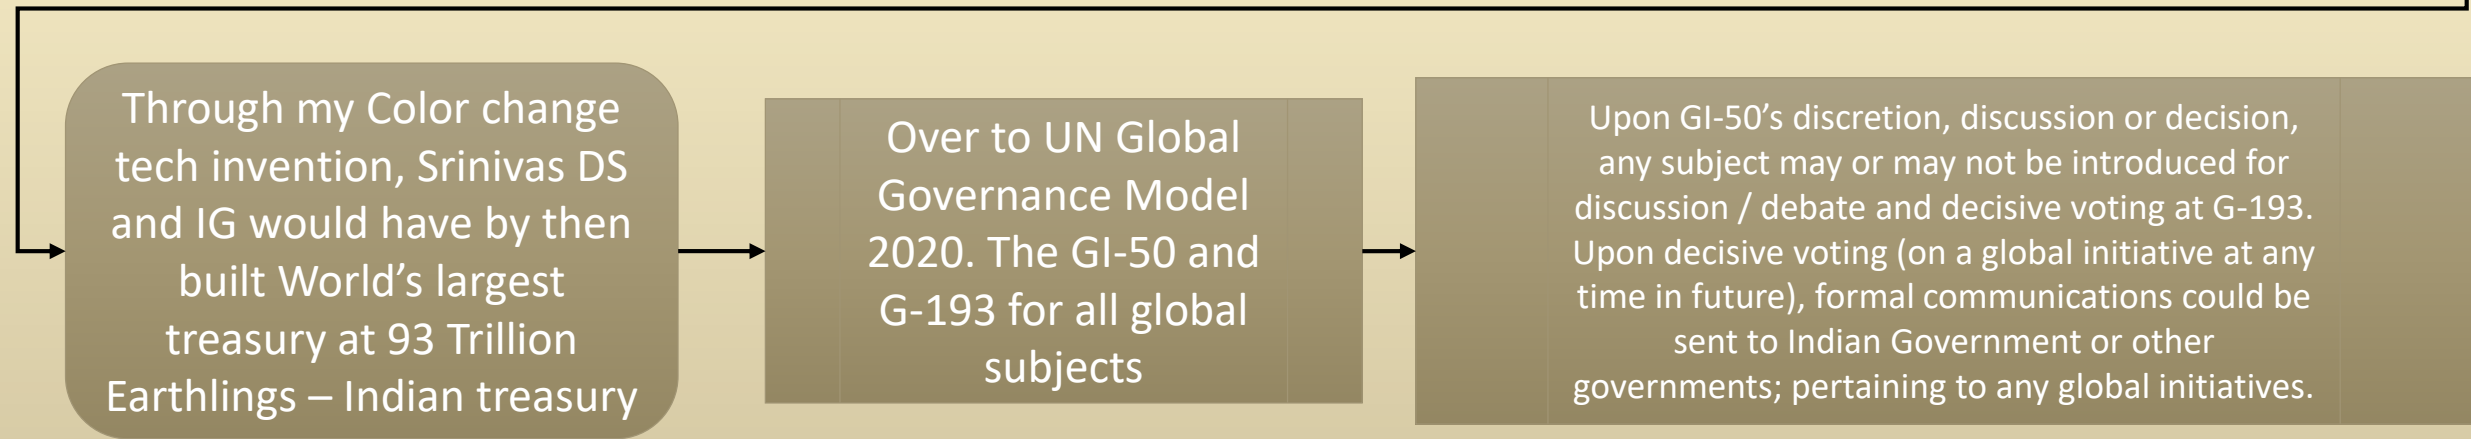

Ongoing Governing Phase – By Jan 1, 2022; United Nations Global Governing Model 2020 must fully go live with all operations fully active and mobilized. Their real 'Global progress & development' and 'Global Peace & prosperity' projects can take off in all countries of the World as appropriate.

High level working protocol of UNGGM-2020©.

- Once the model is rolled out, the GI-50 (Security Council) and G-193 will operate as follows; at a high level.
- All subject matters related to countries, regions, world are segregated in two broad categories. Is that a 'Subject to be reviewed, discussed, analyzed and acted upon by GI-50/G-193'; or is it a guidance matter for a single nation, as it is their internal subject?
- Any topic that comes to UN, will firstly be evaluated by a team before it comes to GI-50. If the evaluating team thinks by law or nature of subject, it is an internal national subject to be dealt by the country, they will guide the country accordingly, by stating that it is an internal subject. Where applicable, if the country needs guidance on the subject, an expert advisory team will provide advice on the subject based on global past experiences from other countries, regions. This is providing guidance, support and marking/closing the subject as resolved.
- The second category, once a subject is of a nature that it has multi-country, regional or global impact, it will be presented for the GI-50 Security council for debate, discussion and evaluation of the problem. At this point, it could take two directions. One, the subject could be resolved by an executive order issued by GI-50 or via an ICJ order (where applicable) to be implemented. The second direction is when GI-50 thinks that the subject needs debate, discussion and a decisive voting at Global level; it is referred to a decisive Voting at G-193 GA.
- At GA – G-193; each such subject presented to them will be led by GA leadership team who will put out a calendar or schedule for decisive voting on the subject. For simpler subjects the decisive voting cycle could just be 1 week or a maximum of 1 month. Here are calendar entry examples or schedules for two globally debatable decisive voting subjects that I have already proposed. Project Earthling© and UN Global Governance Model 2020 itself after roll-out and implantation of Project Earthling©; as all 'Transition Expenses' can go against GEC Earthlings printed and reimbursed against Transition expense project codes.

Sequence of steps to take PE and UNGGM-2020 live.

its adoption globally.

- I have presented the true facts to the media houses, to all Indian citizens, world citizens and all 191 other world countries. The global fraud committed by USA is for everyone to see.
 - All 191 non-USA, non-UK countries will support me & India, as they have seen the global fraud committed by USA.
- I have claimed a conservative-realistic number of 93 Trillion (Earthlings) as my global IP rights sale price to bring into India.
 - All 191 non-USA, non-UK countries will support my claim and India's claim of the 93 Trillion. They understand that myself and India can easily claim 125 Trillion also.
- I am delivering True economic & trade equality; Real economic & trade freedom to all world countries.
 - All 191 non-USA, non-UK countries will support my global Macro-Economic & global Banking reform - Project Earthling© and its go LIVE date of Jan 1st, 2021.
- I am delivering much better, much superior, much more equitable global governance structure.
 - All 191 non-USA, non-UK countries will support my New World Order reform - United Nations Global Governance Model 2020© and its go LIVE by Jan 1st, 2022.

Reset Global Economics & Enable New World Order

Enabling colorful times

The inseparable factors for Goal year 2050.

IG – Indian Government
SG – State Government

With my invention & its 93 Trillion valuation, we have inseparably linked

- The court case claim of 93 Trillion by me & India; to
- Project Earthling© to convert funds into ₹ (Earthlings) and build Indian treasury; to
- 45% government allocation of funds and 45% private Earthling Foundations allocation of funds; to
- Realize Goal Year 2050, to make India a developed country; while being role model to other developing and poor countries in the world.

To achieve Goal Year 2050, we need to work as a team. Bulk of all this work will happen in 'Media Eye'. I need media support to work towards 'Goal Year 2050' and achieve it. India will rise and be a role model to the World countries.

Typical automobile manufacturing

Free Image: Courtesy online search. No copyright violation.

- The image shows the current day automobile manufacturing process steps.
- Involves a sequence of steps from the press shop, body shop, paint shop, assembly line where in two lines trim line and frame line run parallel to come together in the end cab-deck assembly point which further gets assembled to the chassis, to roll-off.
- The line-off process is the distribution step to deliver cars to the dealerships.

Automobile manufacturing

Regular car Vs Cool car

Regular car: Body shop assembles the car body panels except for doors. They are body in white.

Cool car: Body shop assembles the car body panels with vests installed on them. They are body in white with vests.

The assembly line process remains the same. Trim line, Frame line and assembly to chassis.

Cool car: The line off process is completely simplified and made inexpensive. The order, inventory, transportation and delivery management is ONLY by car models and not by colors. The cars delivered as body in white with vests. Dealer injects customers choice of color (from a 1000 shades) at delivery.

For a cool car: In the press shop stage, the pressed body panels, will have the corresponding vests installed. In some cases manufactured and installed.

Regular car: Paint shop paints each car with an individual color. Begins with protective coats, followed by 5 to 8 other coats. Need 1000's of liters of paints by each color. Very expensive installation and material costs.

Cool car: Paint shop is entirely eliminated. The body in white with vests can directly move to assembly line. The protective coats to the sheet metal would be transferred to the suppliers manufacturing process.

Regular car: The line off process has elaborate order, inventory, transportation and delivery management by car models and by colors, to each individual dealerships. Very expensive, complex management and limits customer choices (to 4-5 colors) and delays in delivery.

Automobile manufacturing

Regular car Vs Cool car

Regular car: Dealer has multiple challenges in maintaining inventory at his dealership, by car models and by colors. Its huge investments and expensive procurement and parking costs. Impacts his profitability negatively. Further, cannot respond to customer demands of special colors.

Cool car: Customer choice is unlimited. A full color catalogue with 1000's of shades could be presented to the customer to choose a color from. Dealer injects customers choice of color, and a happy customer drives away. And Customer can change color whenever they want in under 10-15 minutes.

- As you can see, automobile manufacturers and dealerships benefit significantly by cutting various costs, eliminating overheads, simplify manufacturing, supplying, delivering processes and deliver increased customer satisfaction, by switching from making regular cars to cool cars.
- In particular, inventory management, transportation, distribution, manufacturing and painting costs are significantly reduced, if not eliminated.
- Vests manufacturing and installation will be brought and integrated into the JIT (Just in time) process.

Cool car: Dealers challenges are completely minimized. He just has to maintain inventory by car models and not by colors. His costs of inventory, procurement and parking costs are reduced if not eliminated. Increased profitability for dealers. And he can inject any color of customers choice from a palette of 1000's of shades.

Regular car: Limits customer choices to 4 or 5 colors offered by car model. Cannot get a specific color of choice, outside the 4 or 5 colors. Special orders have long wait times. Customer not fully satisfied with purchase. And he cannot change color of the car.

Regular cars are all over the world

- Fact: The number of passenger cars that are plying on roads all over the world today is:
 - 1.37 Billion vehicles on road.
 - Of which an estimated 1 Billion are passenger cars.
- One of the largest streams of businesses that will emerge out of this concept is the “Conversion of current day regular cars to cool cars”.
 - These “NEW Cool car conversion” service businesses could open up all over the world.
 - In fact auto manufacturers will open a channel of business services to request current day owners of their car brands, to bring in their cars and convert them to a cool car for a fee.

1800+ shades of colors available
